Faithful Transformations Nurhaizatul Jamil, 2025-07-08 Malay Muslim women in Singapore cultivate piety by attending popular Islamic self help classes Nurhaizatul Jamil's ethnographic study offers an interdisciplinary analysis of this phenomenon The Islamic self help classes in this book exist at the nexus of sacred texts aphorisms and social media engagements scaffolded by the neoliberal economy that shapes idealized Muslim subjectivities Within a context whereby the Singapore state discursively frames Malayness in terms of cultural deficiency Malay Muslim women's inward focus on transformative ethics rather than societal change underscores the appeal of gendered pious self help discourses At the same time Jamil's referencing of Black Indigenous and Ethnic studies offers a compelling analytical frame that places affective transformation within the context of racial capitalism historical trauma and embodied healing A provocative and rich ethnography *Faithful Transformations* tells the stories of Malay Muslim women desiring piety and self improvement as minoritized subjects in contemporary Singapore while exploring the limitations of self care

The Future of Money Eswar S. Prasad, 2021-09-28 A cutting edge look at how accelerating financial change from the end of cash to the rise of cryptocurrencies will transform economies for better and worse We think we've seen financial innovation We bank from laptops and buy coffee with the wave of a phone But these are minor miracles compared with the dizzying experiments now underway around the globe as businesses and governments alike embrace the possibilities of new financial technologies As Eswar Prasad explains the world of finance is at the threshold of major disruption that will affect corporations bankers states and indeed all of us The transformation of money will fundamentally rewrite how ordinary people live Above all Prasad foresees the end of physical cash The driving force won't be phones or credit cards but rather central banks spurred by the emergence of cryptocurrencies to develop their own more stable digital currencies Meanwhile cryptocurrencies themselves will evolve unpredictably as global corporations like Facebook and Amazon join the game The changes will be accompanied by snowballing innovations that are reshaping finance and have already begun to revolutionize how we invest trade insure and manage risk Prasad shows how these and other changes will redefine the very concept of money unbundling its traditional functions as a unit of account medium of exchange and store of value The promise lies in greater efficiency and flexibility increased sensitivity to the needs of diverse consumers and improved market access for the unbanked The risk is instability lack of accountability and erosion of privacy A lucid visionary work *The Future of Money* shows how to maximize the best and guard against the worst of what is to come

Show Us the Money Paz M. Oliverez, William G. Tierney, 2005 For many urban low income students going to college may not seem feasible for various reasons A primary reason for low participation is a lack of financial resources to pay for higher education and a lack of information about the availability of financial aid When students have families who view college as financially out of reach access to accurate financial aid information is vital to convince them otherwise An in depth look at the ways in which financial aid information is disseminated in nine public and two private high schools in southern California reveals that there are various school and community based efforts being performed to provide students and their families with a range of financial aid related information Yet frequently this information does not reach those most in need The goal of these efforts is often to help urban low income students and their families gain a better understanding of the different resources available to help fund a student's college education Without financial assistance in the form of loans grants scholarships or work study few urban low income families will be able to pay for college on their own California is used as an example insofar as it offers some of the most extensive financial aid services in the United States
