approaches Traditional approaches view validity as a multicomponential concept including for example content construct and  
predictive validity while modern approaches conceptualize it as a unitary concept evaluated through argumentation Drawing  
on the modern approach this book builds a validity argument for an International English Language Testing System IELTS  
listening test sample The book provides some insights into the listening sub skills that the test engages the psychometric  
dimensionality of the test variables that predict item difficulty parameters bias across age nationality test experience and  
gender as well as predictive referenced evidence of validity A variety of techniques including the Rasch model and structural  
equation modelling are used to answer the research questions and to build a validity argument framework this argument  
organizes the thematically related findings into a coherent treatment of the validity of the listening test The book presents  
the first treatment of validity argument and related analytical tools in one volume and maps the psychometric statistical  
analysis tools onto the validity argument framework It also provides an extensive literature review of listening
