A Measurement Instrument to determine the Credibility of Influencers* Christin Smuda, 2018-10-02 Bachelor Thesis from the year 2018 in the subject Communications Public Relations Advertising Marketing Social Media grade 1.0 University of Applied Sciences M nchen language English abstract The aim of this thesis is to develop a measurement scale to determine the credibility of influencers in today's digitalized environment. Thus an extensive literature review will be conducted to reveal underlying dimensions, concepts and impact models of the social construct credibility. Those examinations will provide a well founded overview of the current academic research in this field and will guide the author to the subsequent empirical investigation. Aligning with the structure of key sources the researcher decided on a sequential exploratory research design consisting of a qualitative questionnaire which serves as reliable foundation of the subsequent quantitative questionnaire. Thereby the qualitative survey aims to define and refine the items of the credibility scale, select exemplary influencers for the following rating process and give the author a first feel about the respondents' perception of credibility. In contrast the purpose of the quantitative survey is to collect an extensive amount of data (n = 385) to further select descriptor items that consumers associate with credible influencers and therewith build a reliable and valid base for further analytical calculations.
