covers handling and processing major food commodity groups: meat, dairy products, poultry and eggs, fish and shellfish, cereal grains, bakery products, fruits and vegetables, sugar confectionery. A new final chapter covers the foodservice industry. The text highlights food science links with industry, uniquely using the North American Industry Classification System (NAICS). Overall, the book is thoroughly modernized with over 1500 references cited in recognition of thousands of named food scientists and other professionals. The target readership remains unchanged for the current edition: i.e. Students of food science from senior high school, colleges or universities. Sections of the book will also appeal to advanced readers from other disciplines with perhaps little or no prior food science experience. Additionally, readers covering the intersection of food science with culinary arts, food services and nutrition or public health will find the book useful. Specialty Foods Yanyun Zhao, 2012-05-22

Specialty foods are made from high quality ingredients and offer distinct features to targeted customers who pay a premium price for their perceived benefits. The rise in production and sale of these foods has increased concerns over product quality and safety. Specialty Foods Processing Technology: Quality and Safety explores how these foods differ from other food sectors and describes their specific processing technologies, the equipment used to produce them and steps taken to ensure their quality and microbial safety. The book begins by describing various types of specialty foods, their regulation and the major trends guiding the specialty food industry. It examines the diverse specialty foods marketplace and the strategies and practices that entrepreneurs must understand to be successful specialty food marketers. It also discusses internationally recognized food safety programs and examples of implemented food safety controls. Next, the book presents sharply focused chapters on specific foods: Bread including whole wheat, multigrain, seed, sourdough, organic, gluten free and reduced sodium, as well as functional baked goods; Specialty condiments, dressings and sauces; Jams, jellies and other jelly products; Chocolate including diet friendly, allergen free, dark, gourmet and kosher; Dairy products including specialty cheese, yogurt and other cultured products; Juices and functional drinks; Specialty fruit and vegetable products; Specialty entrees, meats, convenience foods, soups and other miscellaneous items. The final chapter provides additional information and resources for entrepreneurs, including sections on small scale food processing equipment and packaging. Innovators in the food industry will find this resource an invaluable guide to a range of issues critical to the specialty food sector. **Environmentally Friendly**

Technologies for Agricultural Produce Quality Shimshon Ben Yeoshua, 2005-05-26 This book focuses on the most recent environmentally friendly technologies such as physical treatments of heat and modified atmospheric packaging developed to reduce spoilage and maintain the quality of produce. Internationally recognized investigators review the latest knowledge in this field. With several chapters written by the researchers who developed recent scientific breakthroughs, the book details newer technologies in heat treatment that help reduce decay, scalding and chilling injury. Other topics include the technological revolution in transportation of produce from the producing countries to the consuming countries and the growing trend of demand for fresh cut products.
