Mechanics of Sheet Metal Forming D. Koistinen,2012-12-06

This volume records the proceedings of an international symposium on MECHANICS OF SHEET METAL FORMING Material Behavior and Deformation Analysis It was sponsored and held at the General Motors Research Laboratories on October 17-18 1977 This symposium was the twenty first in an annual series The objective of this symposium was to discuss the research frontiers in experimental and theoretical methods of sheet metal forming analysis and also to determine directions of future research to advance technology that would be useful in metal stamping plants Metal deformation analyses which provide guide lines for metal flanging are already in use Moreover recent advances in computer techniques for solving plastic flow equations and in measurements of material parameters are leading to dynamic models of many stamping operations These models would accurately predict the stresses and strains in the sheet as a function of punch travel They would provide the engineer with the knowledge he needs to improve die designs The symposium papers were organized into five sessions the state of the art constitutive relations of sheet metal role of friction sheet metal formability and deformation analysis of stamping operations We believe this volume not only summarizes the various viewpoints at the time of the symposium but

also provides an outlook for materials and mechanics research in the future Mathematical Reviews ,2007 Applied Mechanics Reviews ,1969 **M2AN** ,1991 Stability and Performance of Slopes and Embankments II Raymond Bolton

Finite Element Bibliography Gerard De Vries,1976-12 This bibliography had its inception in 1967 when the compilers first attempted a comprehensive coverage of the finite element literature using both manual and computer based retrieval Initially the data base was stored on a card index but this was subsequently transferred to punched cards and magnetic tape Computer processing was adopted at an early stage to derive the three index formats from the data base Over the subsequent years several versions of the bibliography were produced with two of these being made available in a report form

to other researchers From the widespread interest in these documents it became evident that there was a need for a commercially available comprehensive bibliography in this area A major effort was undertaken to revise update and extend the data base resulting in this present volume The bibliography covers the period 1956 1975 primarily although some earlier publications of historical interest are included The citations are not restricted to the English language and documents are listed in many languages and from diverse places of origin All publication formats were accepted so that references will be found to books monographs journal papers and articles theses dissertations reports surveys and the like
