Financial Aid Prices Returns

Daniela Niemeyer

Financial Aid Prices Returns:

Predatory Pricing in Antitrust Law and Economics Nicola Giocoli,2014-01-10 Can a price ever be too low Can competition ever be ruinous Questions like these have always accompanied American antitrust law They testify to the difficulty of antitrust enforcement of protecting competition without protecting competitors As the business practice that most directly raises these kinds of questions predatory pricing is at the core of antitrust debates The history of its law and economics offers a privileged standpoint for assessing the broader development of antitrust its past present and future In contrast to existing literature this book adopts the perspective of the history of economic thought to tell this history covering a period from the late 1880s to present times The image of a big firm such as Rockefeller s Standard Oil or Duke s American Tobacco crushing its small rivals by underselling them is iconic in American antitrust culture It is no surprise that the most brilliant legal and economic minds of the last 130 years have been engaged in solving the predatory pricing puzzle The book shows economic theories that build rigorous stories explaining when predatory pricing may be rational what welfare harm it may cause and how the law may fight it Among these narratives a special place belongs to the Chicago story according to which predatory pricing is never profitable and every low price is always a good price

Financing Institutions of Higher Education John Y. Campbell,Kaye Husbands Fealing,2026-02-11 An insightful wide ranging analysis of the economic hurdles facing America s higher education system The US higher education sector faces numerous economic challenges including the stagnating number of college age domestic students geographic mismatch between population growth and the location of colleges and universities financial pressures including cutbacks in government support growing student debt burdens sticker prices that deter prospective applicants and the risk of low capital market returns on endowment portfolios This volume analyzes the responses of students families and the financial managers of higher education institutions to these challenges It presents new insights into the substantial disparities in the financial structure of and the financial challenges facing different types of institutions The volume draws together contributions from financial economics public finance and industrial organization as well as the economics of education
