The AI Factory: AI Capability Guide for SMEs Kevin Shepherdson, Celine Chew, Joaquin Jay Gonzalez III, This book is about empowering the leaders of Small and Medium Enterprises (SMEs) and their teams to build their own AI Factory. In a world where everyone has access to the same off-the-shelf AI tools, the real advantage lies in creating intelligence that is uniquely yours, rooted in your data, your expertise, and your customers. While the primary focus is on SMEs, the ideas and frameworks in this book also benefit gig workers, consultants, trainers, solopreneurs, and mid-career professionals who may be navigating career uncertainty or seeking to upgrade their skills with generative AI. For them, building an AI Factory offers a way to differentiate, stay relevant, and deliver unique value to their clients or organizations. Through the factory metaphor, we show how to visualize and structure AI as part of your processes so it becomes a driver of competitiveness, efficiency, growth, and innovation. And here's the key: you don't need to be a coder. With the right mindset and practical toolkit, any professional can move beyond simply consuming generic AI products to

manufacturing intelligence that is tailored to their goals Now imagine a modern day manufacturing plant that ingests vast amounts of raw data to produce at scale intelligence and insights instead of tangible goods we can feel and touch This is the AI Factory Like many factories the AI Factory operates on two floors which are discussed further in this book
