- 1 Substrates The substrate is the material that anchors your plant's roots As this farming is carried out without the soil you need to replace it with such material which can retain moisture provide firm support and foster aeration The substrate is made up of a combination of certain things including clay pebbles peat moss oasis cubes coconut fiber lava rocks and grow stones There are many varieties of substrates It solely depends on the plant that you would be growing in the hydroponic system to decide which substrate you are going to choose
- 2 Nutrients Nutrients are one of the primary sources for the growth which is required by the plants Providing the appropriate mixture of the nutrient mix in the right amount of water is a must The plants only depend upon the precise water nutrient mixture to survive and grow since there is no soil You can buy commercial nutrient solutions which are available in the market whereas you can even make the nutrients yourself in your home
- 3 Maintenance Your nutrient solutions need to be checked frequently to ensure the right amount of pH is being dispersed among the plants If the pH is high or low it will not let the plant to uptake the nutrients in a thorough manner

Oxygen levels and the temperature also need to be checked regularly Many hydroponics systems require the water to be changed clean and maintaining the equipment to stave off parasites or mold Let s know about the crucial equipment needed for a successful hydroponic design We will also discuss how to get effective results from hydroponics You will need to choose the best equipment to ensure the success of hydroponic gardening Are you ready to build your very own hydroponic garden That s right I ve created this book in order to share my knowledge to you
