A Rhetoric for Argument Jeanne Fahnestock, Marie Secor, 1981-12-01 Teaching Science Students to Communicate: A Practical Guide Susan Rowland, Louise Kuchel, 2023-04-25 This highly readable book addresses how to teach effective communication in science. The first part of the book provides accessible context and theory about communicating science well and is written by experts. The second part focuses on the practice of teaching communication in science with nuts and bolts lesson plans direct from the pens of practitioners. The book includes over 50 practice chapters each focusing on one or more short teaching activities to target a specific aspect of communication such as writing, speaking, and listening. Implementing the activities is made easy with class run sheets, tips, and tricks for instructors, signposts to related exercises, and theory chapters, and further resources. Theory chapters help build instructor confidence and knowledge on the topic of communicating science. The teaching exercises can be used with science students at all levels of education in any discipline and curriculum; the only limitation is a wish to learn to communicate better. Targeted at science faculty members, this book aims to improve and enrich communication teaching within the science curriculum so that science graduates can communicate better as professionals in their discipline and future workplace. *A Rhetoric of Argument* Jeanne Fahnestock, Marie Secor, 2004. The stasis approach pioneered by Fahnestock and Secor distinguishes among four basic questions that arguments are written to answer: What is it? Definition arguments. How did it get that way? Causal arguments. Is it good or bad? Evaluation arguments. What should we do about it? Proposal arguments. These four questions, now standard in many argument texts, give students a constructive, engaging way to analyze arguments by other writers and to construct their own arguments. Gaming Democracy Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In *Gaming Democracy* Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both
