

AASB 13 *Fair Value Measurement*

- Fair value is a market-based measurement, not an entity-specific measurement
 - Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk
 - An entity's intention to hold an asset or to settle or otherwise fulfil a liability is not relevant when measuring fair value
- A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:
 - In the principal market for the asset or liability; or
 - In the absence of a principal market, in the most advantageous market for the asset or liability
