The Case

A murder has occurred right here on our peaceful little island of Hilton Head. As top-notch biology students at HBCA, you have been asked to assist in the investigation of this most unfortunate incident. Central to identifying the individual who committed this crime is establishing where the victim was the day of the crime so that detectives can question the individuals with whom the victim came into contact. An autopsy was performed on the victim and has revealed that the victim ate just prior to the time of death. Upon questioning the victim's friends and family, detectives working the case have learned that the victim enjoyed eating at the following places:

Far Super's Pizzeria

The victim would never eat thick crust pizza from anywhere else! The victim would typically order a pizza with sausage, pepperoni, and bacon.

1. **Prediction:** What two macromolecules would you most expect to find in the stomach contents of the victim if his last meal was eaten here?

The Shorehouse

The victim would hang out here to watch sporting events while feasting on Wingfest wings and celery.

2. **Prediction:** What two macromolecules would you most expect to find in the stomach contents of the victim if his last meal was eaten here?

Famous Eats

The victim loved to go here for a night of bread, olive oil, and buttery and creamy pasta.

3. **Prediction:** What two macromolecules would you most expect to find in the stomach contents of the victim if his last meal was eaten here?
