Fantasy Football Prices:

Drinking from the Fire Hose Christopher J Frank, Paul Magnone, 2011-09-01 You're sitting in a windowless conference room. Twenty minutes into the meeting, the presenter finally makes it to slide four of a thirty-two slide deck. At least you can read this one, unlike the others which were crammed with numbers, graphs, and charts. You look around wondering if anyone else is following the presentation. Just about everyone these days suffers from information overload, the 24/7 explosion from our computers, smartphones, media, colleagues, and customers. Information is essential to making intelligent decisions, but more often than not, it simply overwhelms us. It's like trying to drink from a fire hose. The question isn't how to stop all those e-mails, meetings, conference calls, and fat reports that's impossible. The question is what to do with them. How do you find the truly essential nuggets of information and use them with confidence? The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple. Learn how to ask the right questions at the right time. Whatever field you're in, asking smarter questions will expose you to new information, point you to connections between seemingly unrelated facts, and open new avenues of discussion with your colleagues. The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details. And they show, through real-life case studies including Trader Joe's, Starbucks, Kodak, Microsoft, iRobot, and IBM, how their method can have a dramatic impact. It really is possible to convert the fire hose of information into useful insights. Consider a non-business example: the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe. Tens of thousands of flights were canceled, and five million passengers stranded, leading to billions in economic losses. Europe's best scientists generated oceans of data and carefully modeled the cloud's dispersion pattern. But no one could answer the essential question: Was the concentration of volcanic ash in the air enough to damage a jet engine? Without that key answer, all the carefully gathered facts were useless to the decision makers. Once you adopt the seven questions, you'll start having more productive brainstorming sessions. You'll answer critical questions faster and find unexpected solutions to important problems. And you'll get better at communicating to your colleagues with more clarity and focus, turning down the fire hose that other people have to cope with. **Sport**

Management Education Mike Rayner, Tom Webb, 2022-01-27 This book examines a range of contemporary issues related to the global delivery of sport management education. At a time of unprecedented change in Higher Education, the book looks closely at how sport management education can and should deliver positive outcomes in sport business and management outside of the university. The book brings together sport management academics from around the globe and examines how their practice in education has been shaped by the cultural, religious, and political context of the national regions in which they work. It aims to identify core principles in sport management education and implementation and discusses the key aspects of sport management programmes, from curriculum design and pedagogy to issues around unified accreditation and the needs of employers. It also focuses in on what sport management education might look like in an increasingly digital post

Economics is Like Sex Jonathan M. Lamb, 2018-04-03 Economics has become a taboo topic because it is not well understood As a taboo topic it doesn't get discussed and since it is not discussed it is not understood what a vicious cycle Shying away from open discussions about money budgets markets and trade has resulted in many misconceptions Economics is all around us and with a little common sense understanding of economic principals Jonathan M Lamb changes the way people view the world Economics is Like Sex advocates that economics isn't a boring subject filled with charts and theories cooked up by some dead guys who lived centuries ago Economics is about decisions Decisions that relate to money life love and happiness Economics is not just for government and business but is a way of everyday life and some very simple economic thinking can make life just a little bit less complicated when it comes to money Money can't buy love or happiness but Jonathan Lamb opens the taboo topic to provide a common sense understanding of how basic easy common sense economic principals can change the way people view the world
