Grazia Mental Health Daily Tracker and Journal Tom Wavre, I am 1 in 4, 2018-02-05 This book brings together a number of principles and practices that can help you with your mental health and general well being. These include tracking of your mood sleep habits achievements journals practising gratitude and setting daily achievable goals. By engaging with the material you are able to set a solid and positive foundation to your day which will in turn help shape your day in the way you would want rather than being pushed and pulled by the various demands and distractions provided by modern day living. As with anything of this nature it is important to engage with the content as much as possible to achieve the biggest benefits. With that in mind though it is important to not scold yourself for not completing a section or missing a few days. It should act as a means to concentrate the mind and give you a focus at the start and end of each day helping to guide you and keep you focused on the things you want to be focused on rather than the inevitable day to day distractions. In those times when we need the most help it is beneficial to have already listed out some things that can help you in those moments. Feel free to use these as work best for you for example if quotes just don't have any impact substitute something that does. For the things and activities this can be photographs songs mindfulness swimming reading etc absolutely anything that you find helpful. When you are next in a depressive state reminding yourself of these things can be of great help. The majority of the book is made up of 12 weeks worth of daily entries. These daily entries are split into two halves. Firstly those that are to be completed first thing in the morning ideally before you even look at your phone. By delaying looking at your phone you begin the day on a solid footing based on your own wishes and desires. We also do not start the day by seeing some bad news or something else on social media that has the ability to put us in a bad mood right from the off. Secondly those that are to be completed later in the day.

ideally at bedtime This can help to clear the mind ready for bed and be part of a proactive bedtime routine that increases your chances of a good night sleep As stated above if you skip one or a day or you don't achieve a goal etc please do not worry about it Nobody ever achieved all of their goals every day The science tells us that if you practice a new habit for 21 days straight it begins to become part of our natural routine So whilst some of this may seem difficult to begin with if you stick with it it will become easier over time until it is a set part of your day I hope you find the book helpful and I hope you see a sustained improvement in your mental health Tom Wavre Founder iam1in4.com
