calculation sheets yet some of them need to be challenged on advanced word problems including math contest problems How can I teach students with such a diversified background Children not only need to learn math but some of them also need to do puzzles to activate their brains and increase their IQ With the above in mind I created many separate workbooks including basic calculation word problems puzzles and I even incorporated chess moves into my math worksheets With all these efforts ironically I created an additional problem for myself which I have to use 4 workbooks to teach one child In 2015 I started to pay attention to Chinese after school learning centre s teaching materials and started to compare their teaching materials with our North American materials At the same time I researched the materials from Singapore Taiwan and puzzles from Japan and Britain These analytical researches have led me to have an idea to combine all my published workbooks into one large workbook which includes math contest problems IQ fitness word problems and chess and math integrated worksheets
