Building Smart Home Automation Solutions with Home Assistant Marco Carvalho,2023-09-15 A step by step guide to building cost effective and complete home automation DIY projects using tools such as Home Assistant Raspberry Pi IoT devices the Tasmota sensor ESP32 and Grafana Key Features Learn by doing using real life practical examples to build your own home automation system Create hack and configure IoT devices through hands on projects to be used with or without Home Assistant Customize your home automation system using Home Assistant Node RED InfluxDB and Grafana Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionPicture a home where you can adjust the lighting based on the time of day or when movement is detected In this same home you can also detect when a door is unexpectedly opened or an alarm is triggered in response to any suspicious activity Such automated devices form part of a smart home and the exciting part is that this book teaches you how to create and manage these devices all by yourself

This book helps you create your own ecosystem to automate your home using Home Assistant software. You'll begin by understanding the components of a home automation system and learn how to create, hack, and configure them to operate seamlessly. Then you'll set up Home Assistant on a Raspberry Pi to work as a home automation server, build your own IoT sensors based on ESP32, ESP8266, and set up real-life automation use cases using hands-on examples and projects. The chapters will also guide you in using software tools such as Node-RED, InfluxDB, and Grafana to manage present and use data collected from your Home Automation devices. Finally, you'll gain insights into new technologies and trends in the home automation space to help you continue with your learning journey. By the end of this book, you'll be able to build your own creative IoT-based home automation system using different hardware and software technologies.

What you will learn:

- Understand the fundamental concepts of home automation systems.
- Set up a home automation system using Home Assistant and Raspberry Pi.
- Create and configure ESP8266-based sensors to work with Home Assistant.
- Hack a commercial actuator to work with Home Assistant using Tasmota.
- Create automations, customize, and use applications with Home Assistant.
- Leverage IoT software tools to take your home automation to the next level.
- Work on hands-on projects including LED strip lights and an ESP32 five-zone temperature logger.
- Explore home automation FAQs, emerging technologies, and trends.

Who this book is for: The book is for engineers, developers, students, makers, and enthusiasts who are working on or interested in working with electronics and IoT devices, embedded systems, systems integration, computer software, and coding to develop their own smart home automation systems. Technicians, teachers, and other professionals who want to learn home automation-related technologies will also find this book useful.

Prior experience: Prior experience of working with Raspberry Pi, creating hardware prototypes, and software programming will be beneficial.

Linux Smart Homes For Dummies Neil Cherry, 2006-07-14

A Linux smart home is about controlling and monitoring devices and information around your home using a standard personal computer, Linux, and its vast array of open-source tools. You don't have to be a master programmer to create one. If you like to tinker with Linux, *Linux Smart Homes For Dummies* will guide you through cool home automation projects that are as much fun to work on as they are to use. Home automation used to be limited to turning on lights and appliances and maybe controlling your thermostat and lawn sprinkler from your computer. While you still might not be able to create all the Jetsons toys today, you can also:

- Build a wireless network.
- Create and set up a weather station.
- Automate your TV and sound system.
- Spy on your pets when you're not home.
- Set up an answering system that knows what to do with calls.
- Increase your home's security.

If you know how to use Linux and a few basic development tools (Perl, the BASH shell, development libraries, and the GNU C compiler), *Linux Smart Homes For Dummies* will help you do all these tricks and more. For example, you can:

- Discover the best sources for Linux-based home automation devices.
- Set up a wireless network, create a wireless access point, build a bridge between wired and wireless networks, and route your own network traffic.
- Build a personal video recorder with MythTV that will record to DVD or set up a wireless streaming music system.
- Create a smart phone system that takes messages and forwards

them to your fax modem or answering machine Build a weather station that notifies you of severe weather alerts Control and secure your home automation network and even check on your house when you re away The bonus CD ROM includes all kinds of cool open source software for your home automation projects Linux Smart Homes For Dummies even includes lists of cool gadgets to check out and great ways to automate those boring household chores A smart home s a happy home
