

VSA Trading Strategy

Volume is the amount of an asset that is being traded in a given time. For example, if 10,000 shares of Apple are bought and sold in a given day, this is known as volume. If the volume drops to 8,000 the following day, you can say that the volume has declined.

A spread, on the other hand, is the difference between two things. A common definition of a spread in forex trading is the difference between the bid and ask price of a pair.
