Covers the considerable advances and latest developments in this subspecialty through updates and revisions to existing material. **Winning Women Into**

Mathematics Mathematical Association of America. Committee on Participation of Women, 1991 American media often ask why women can't do mathematics. Any answer is misleading. Better questions are needed along with indications of how to find potential answers. The Committee on the Participation of Women of the Mathematical Association of America (MAA) has identified more than fifty cultural customs that discourage aspiring women mathematicians. How can these customs be changed? What can be done to recruit, retain and acknowledge women in mathematics? The Committee was established in 1987 to work for full involvement of women in the affairs of the MAA and to develop MAA activities that will encourage women in careers in the mathematical sciences. With this book the committee seeks to expand the number and effectiveness of those winning women into mathematics. Publisher's description **Basic Mathematical Skills with Geometry** James
