This multi disciplinary book provides insight in how to establish consumer trust in electronic commerce It goes into detail on  
a broad variety of consumer trust criteria with regard to the security and reliability of electronic consumer transactions what  
information must be provided to consumers how to create a legally binding contract online confidence in electronic payments  
the resolution of disputes what law applies to the electronic consumer contract which body is entitled to settle the dispute  
and personal data protection By means of these criteria it is assessed into what extent consumer trust is ensured by the  
application of a public key infrastructure which supports cryptographic services such as electronic signatures and encryption  
An assessment is also made on the European Union cryptography policy and the European Union policy on consumer  
protection in electronic commerce In addition a wide range of co regulation and self regulation initiatives within the  
European Union and Northern America are assessed Finally this book provides a consumer trust framework which learns  
that various ingredients at different levels are required to build consumer trust in electronic commerce As such it clarifies  
the roles and responsibilities of government industry and consumer organisations businesses as well as consumers  
themselves      Official Records ,1997      **Web Techniques** ,1998
