Problem

### Problem 1:

- (a) Plot the result of convolving a one-dimensional function consisting of three impulses with a triangular function as shown below:

- (b) Plot the result of convolving a one-dimensional function consisting of a rectangular function with the same triangular function used in part(a), as shown below:

- (c) Plot the result of convolving a pair of identical even "top-hat" (pulse) functions:  $f(t) = 1$  for  $|t| < T/2$  and  $f(t) = 0$  otherwise. Use your result show that the Fourier transform of a triangular pulse (such as used in parts (a) and (b)) is of the form  $(\sin(x)/x)^2$ .

**Problem 2:** Show that when two gaussian functions

$$f_1(x) = e^{-ax^2}$$
$$f_2(x) = e^{-bx^2}$$

are convolved, the result is another gaussian function.

**Hint:** Complete the square in the exponent, change the variable of integration, and recognize that

$$\int_{-\infty}^{\infty} e^{-x^2} dx = \sqrt{\pi}$$

## **Matlab Homework Solutions:**

MATLAB Primer Timothy A. Davis, 2010-08-18 Highlighting the new aspects of MATLAB 7.10 and expanding on many existing features this eighth edition continues to offer a hands on step by step introduction to using the powerful tools of MATLAB It includes a new chapter on object oriented programming a new discussion of the MATLAB File Exchange window major changes to the MATLAB Editor and an explanation of more powerful Help tools It also presents a synopsis of the most frequently used functions operators and special characters providing quick and easy access to frequently used information M files and MEX files for large examples are available at [www.crcpress.com](http://www.crcpress.com)      **The Analysis and Design of Linear Circuits**

Roland E. Thomas, Albert J. Rosa, Gregory J. Toussaint, 2016-01-05 The Analysis and Design of Linear Circuits 8th Edition provides an introduction to the analysis design and evaluation of electric circuits focusing on developing the learners design intuition The text emphasizes the use of computers to assist in design and evaluation Early introduction to circuit design motivates the student to create circuit solutions and optimize designs based on real world constraints This text is an unbound three hole punched version      **Teaching and Learning Mathematics Online** James P. Howard, II, John F.

Beyers, 2020-05-10 Online education has become a major component of higher education worldwide In mathematics and statistics courses there exists a number of challenges that are unique to the teaching and learning of mathematics and statistics in an online environment These challenges are deeply connected to already existing difficulties related to math anxiety conceptual understanding of mathematical ideas communicating mathematically and the appropriate use of technology Teaching and Learning Mathematics Online bridges these issues by presenting meaningful and practical solutions for teaching mathematics and statistics online It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with our professional community The book provides a set of standard practices improving the quality of online teaching and the learning of mathematics Instructors will benefit from learning new techniques and approaches to delivering content Features Based on the experiences of working educators in the field Assimilates the latest technology developments for interactive distance education Focuses on mathematical education for developing early mathematics courses      **Operations and Production Systems with Multiple Objectives**

Behnam Malakooti, 2014-02-03 The first comprehensive book to uniquely combine the three fields of systems engineering operations production systems and multiple criteria decision making optimization Systems engineering is the art and science of designing engineering and building complex systems combining art science management and engineering disciplines Operations and Production Systems with Multiple Objectives covers all classical topics of operations and production systems as well as new topics not seen in any similar textbooks before small scale design of cellular systems large scale design of complex systems clustering productivity and efficiency measurements and energy systems Filled with completely new perspectives paradigms and robust methods of solving classic and modern problems the book includes

numerous examples and sample spreadsheets for solving each problem a solutions manual and a book companion site complete with worked examples and supplemental articles Operations and Production Systems with Multiple Objectives will teach readers How operations and production systems are designed and planned How operations and production systems are engineered and optimized How to formulate and solve manufacturing systems problems How to model and solve interdisciplinary and systems engineering problems How to solve decision problems with multiple and conflicting objectives This book is ideal for senior undergraduate MS and PhD graduate students in all fields of engineering business and management as well as practitioners and researchers in systems engineering operations production and manufacturing

Herniter, 2001 This is one of the most comprehensive books ever published on introduction to computers This self paced text is graphically oriented with step by step screen captures The book is designed to provide tutorial information on DOS Windows Word R for Windows Excel R for Windows PowerPoint R and shareware has two components the printed text shows students how to use a personal computer with Windows 2000 and various application programs including Microsoft R Office 2000 New to this edition are

chapters on Windows 2000 Office 2000 Networking Systems Administration and the World Wide Web The CD ROM contains tutorial information on DOS Windows 3 x Windows 95 and application programs based on Windows 3 1 and Windows 95 Employers and academics have applauded this landmark publication **MATLAB Programming** Dingyü Xue,2020-03-23 This book presents fundamentals in MATLAB programming including data and statement structures control structures function writing and bugging in MATLAB programming followed by the presentations of algebraic computation transcendental function evaluations and data processing Advanced topics such as MATLAB interfacing object oriented programming and graphical user interface design are also addressed Conference Record ,2004 **Linear Algebra and Its Applications** David C. Lay,2003 *Electrical Engineering* Allan R. Hambley,2011 For undergraduate introductory or survey courses in electrical engineering ELECTRICAL ENGINEERING PRINCIPLES AND APPLICATIONS 5 ehelps students learn electrical engineering fundamentals with minimal frustration Its goals are to present basic concepts in a general setting to show students how the principles of electrical engineering apply to specific problems in their own fields and to enhance the overall learning process Circuit analysis digital systems electronics and electromechanics are covered A wide variety of pedagogical features stimulate student interest and engender awareness of the material s relevance to their chosen profession *Engineering Mechanics* Robert W. Soutas-Little,D. J. Inman,1999 For courses in Dynamics State of the art in both perspective and approach this text puts the motion back into the presentation of dynamics Drawing on the power and widespread use of modern computational tools e g MathCAD MATLAB Mathematica and Maple it is written from the point of view that the systems of interest are in motion and focuses on solving the dynamics problems for general time and plotting and visualizing the response Text designed to be used in conjunction with a computational software package and an accompanying manual The manual includes all the examples from the text and key stroke instructions for the applicable tool and allows the student to compute solutions and to visualize physical properties Explains how to use the software to solve the problems in the text Features a unique pedagogical approach unlike the standard compute the acceleration at a single time or position approach taken by most other texts this text Treats dynamics as founded on Newtons laws which produce differential equations Presents the entire motion of particles and rigid bodies through the analytical or numerical solution of those equations Allows the v **IEEE Circuits & Devices** ,2001 **Feedback Control of Dynamic Systems** Gene F. Franklin,J. David Powell,Abbas Emami-Naeini,1994 Emphasizing modern topics and techniques this text blends theory and real world practice mixes design and analysis introduces design early and represents physically what occurs mathematically in feedback control of dynamic systems Highlights of the book include realistic problems and examples from a wide range of application areas New to this edition are much sharper pedagogy an increase in the number of examples more thorough development of the concepts a greater range of homework problems a greater number and variety of worked out examples expanded coverage of dynamics modelling and Laplace transform topics and integration of MATLAB including many

examples that are formatted in MATLAB
