content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating *Vanity Fair* ,2018 Prospect ,2009

sequently chapter 4 deals with asset management and the new trends in the industry Chapter 5 describes the development of
the fintech industry Definitions and regulations of the fintech companies are part of this chapter In chapter 6 the scientific
investigation will be conducted and presented The results will show how stable the new technologies are in order to give an

interviews that have been conducted with qualified specialists that work or research in the robo advisory industry The
question of whether and how the robo advisors will survive the next financial crisis is topic of the interviews There has been
no financial crisis that might have caused unforeseen problems for the systems ever since the creation of robo advisory Thus
it is unknown how those technologies will react to chaotic market situations The idea was to ask companies to what extent

Daniel Wiechmann,2009-10-04 Master s Thesis from the year 2009 in the subject Communications Multimedia Internet New Technologies grade B1 University of Glasgow course Media Management language English abstract The music business is one of the few industries that has trouble growing profits in its transition to digital Digital media downloads mobile music streams music flat rates peer to peer networks and the rise of freeconomics on the Internet are partly responsible for the reduction in CD sales in recent years The question that is most important for the industry is how the widespread of freely available content and illegal downloading can be monetised One approach to model around the main threats to the music industry is the development of online music services Thus this study is an attempt to address the issue of what are the opportunities and challenges posed by online music services for the music recording industry Referring to empirical findings of a consumer survey and expert interviews both opportunities and challenges can be identified for the music recording industry The opportunities surrounding the development of these services are encouraging Deriving from the challenges the music recording industry must ensure that online music services are a supplement to traditional ways of consumption and do not turn into a replacement of physical music consumption Concluding online music services have a small impact on the recording industry The industry might benefit from closely cooperating with online music services by learning more about consumers tastes Nevertheless the online businesses are struggling to break even and revenues from streaming will not overcome legal downloads or CD sales as major revenue stream anytime soon *The Times Index* ,2013-05 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement *A New Approach for Developing Business Model Innovation*
