2 The Last Invention The Impact Of Advanced Ai
Francisco Jerbesson De Freitas Morais,2026-01-15 The Last Invention The Impact of Advanced Artificial Intelligence
Humanity has always moved forward by creating tools But for the first time it has created something capable of thinking learning and deciding In The Last Invention readers are taken on a deep clear and forward looking exploration of the rise of advanced artificial intelligence and its irreversible consequences for civilization The book examines how AI has evolved from a simple technological tool into a global cognitive infrastructure transforming education labor economics governments art science and even the human mind itself With accessible language and strong technical rigor the work explores the historical evolution of artificial intelligence how neural networks and large language models truly function the rise of multimodal generative AI the direct impact of AI on the global economy professions and geopolitical power and the ethical social and human limits of this transformation Moving beyond both technological hype and dystopian fear the book presents a central argument the greatest risk of AI is not the machine itself but how humanity chooses to use it By addressing themes such as expanded cognition digital exclusion inclusive interfaces augmented humans and mental sovereignty the book reveals that AI can become either the greatest instrument of inclusion ever created or the most sophisticated mechanism of inequality in human history The Last Invention is

A Review of Recent Advancements in Deep Reinforcement Learning Artur Sahakjan,2018-08-02 Bachelor Thesis from the year 2018 in the subject Computer Science Commercial Information Technology grade 1 0 University of Duisburg Essen language English abstract Reinforcement learning is a learning problem in which an actor has to behave optimally in its environment Deep learning methods on the other hand are a subclass of representation learning which in turn focuses on extracting the necessary features for the task e g classification or detection As such they serve as powerful function approximators The combination of those two paradigm results in deep reinforcement learning This thesis gives an overview of the recent advancement in the field The results are divided into two broad research directions value based and policy based approaches This research shows several algorithms from those directions and how they perform Finally multiple open research questions are addressed and new research directions are proposed
