**Unconventional Customer Service** Robert D. Sollars,2018-10-24 Welcome to *Unconventional Customer Service* How To Break the Rules and Provide Unparalleled Service This book was designed to

assist you and your company in the pursuit of providing excellent customer service to those who count the most in your business. The basic precepts that I present here are as applicable to a salesman selling knickknacks as they are to a security officer walking a patrol in a dark warehouse at 3:00 a.m. Excellent customer service is what customers want above all. Over my decades of working in many capacities for many different types of companies, I have personally used all of these ideas and they've all worked extremely well and achieved great client satisfaction. They may need some tweaking to fit your company, but they will work. I guarantee it. Knowing Robert for the past 30 years, I've seen his unconventional customer service grow in popularity. It simply works. I would not hesitate to recommend that you consider his expertise and his passion for assisting others with this issue.

Jerold A. Ramos Sr. CFE, CPP, CRM, CMMR. Customer Service Excellence. Lisa Ford, 1998. Excuses, Excuses, Excuses -- Darryl S. Doane, Rose D. Sloat, 2001. The Need to Maintain Employee Counts in Providing Customer Service. Cynthia S. Troller, 2007. The purpose of this dissertation was to determine the need to maintain employee counts in providing customer service. Purchase decisions are influenced by customer service and merchandise presentation. Companies must determine the best staffing fit to their strategic goals. A return on investment for staffing expenditures was sought here. Using mixed methodology, this research found that at the industry level, no relationship between profit change and sales change or employee count change. Data such as sales volume spikes, adding store count, and marketing initiatives were found to explain increasing employee counts. Meanwhile, these decisions to add to employee count did not develop a pattern of creating sales or profit increases. A return on investment for maintaining employee counts could not be determined at the macro level. A review by individual store is recommended for future research. This study does provide an investigation into the link between human capital theories and workforce reduction to service in the retail sector. The concentration on retailing adds to the existing body of knowledge where the functions of these theories have not been analyzed independent of other service industries.
