Understanding Digital Signal Processing with MATLAB® and Solutions Alexander D. Poularikas,2017-11-13 The book discusses receiving signals that most electrical engineers detect and study The vast majority of signals could never be detected due to random additive signals known as noise that distorts them or completely overshadows them Such examples include an audio signal of the pilot communicating with the ground over the engine noise or a bioengineer listening for a fetus heartbeat over the mother s The text presents the methods for extracting the desired signals from the noise Each new development includes examples and exercises that use MATLAB to provide the answer in graphic forms for the reader s comprehension and understanding

**SIGNAL PROCESSING in MATLAB. INTERACTIVE SIGNAL ANALYZER and COMMON APPLICATIONS** G. Peck,2017-12-25 The Signal Analyzer app is an interactive tool for visualizing measuring analyzing and comparing signals in the time domain in the frequency domain and in the time frequency domain The app provides a way to work with many signals of varying durations at the same time and in the same view A typical workflow for inspecting and comparing signals using the Signal Analyzer app is 1 Select Signals to Analyze Select any signal available in the MATLAB workspace The app accepts numeric arrays and signals with inherent time information such as MATLAB timetables and timeseries objects 2 Explore Signals Add time information to signals using simple rates numeric vectors duration arrays or MATLAB expressions Plot measure and compare data their spectra or their spectrograms Look for features and patterns in the time domain in the frequency domain and in the time frequency domain Compute persistence spectra to analyze sporadic signals and sharpen spectrogram estimates using reassignment Extract regions of interest from signals 3 Share Analysis Copy displays from the app to the clipboard as images Export signals to the MATLAB workspace or save them to MAT files Generate MATLAB scripts to automate the computation of power spectrum spectrogram or persistence spectrum estimates and the extraction of regions of interest Save Signal Analyzer sessions to resume your analysis later or in another machine The Signal Analyzer app works with vectors matrices MATLAB timetables or timeseries objects in the MATLAB workspace
