Night Sky Viewing Guide

John Scalzi

Night Sky Viewing Guide:

A Stargazing Program for Beginners Jamie Carter, 2015-11-20 Sets out a simple month by month program to reveal all of the night sky's biggest and most beautiful secrets in just one year and with only a few hours of stargazing each month. By investing just an hour a week and 50 in binoculars it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns and what they tell us about Earth, the seasons, and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12-month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are to the beginner almost beyond belief. As well as the vital constellations and clusters and the weird and wonderful nebulas he searches out dark sky destinations across the globe that help increase knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star charts, binoculars, smartphone apps, telescopes, spots, satellites, and attempts basic astro photography. By year's end the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are, and even where the Galactic Center Point is.

Start with the easy-to-find constellations during each season and work toward the more difficult ones. Better yet, you'll learn how to locate any constellation in relation to the Big Dipper, the North Star, and the top of the sky. With two ways to locate each constellation, you'll know where in the sky to look and what to look for. Along the way, you'll be introduced to mythology, facts, and tidbits, as well as details about the planets, solar system, and more. As an added bonus, the book comes with a red light flashlight for night reading.
