Cultivating Mathematical Hearts Maria del Rosario Zavala, Julia Maria Aguirre, 2023-11-27 Help students see their whole selves in the math they're learning with culturally responsive teaching. Cultivating Mathematical Hearts: Culturally Responsive Mathematics Teaching in Elementary Classrooms aims to re-center mathematics as a humanizing endeavor because putting children and their humanity at the heart of mathematics education can result in more engaged, meaningful, and joyful learning. This book introduces a model and a tool for Culturally Responsive Mathematics Teaching constructed to create a safe, inclusive space where all learners can come together in their own educational journey and develop a love for math that centers their experiences and comes from the heart. Implementing the Culturally Responsive Mathematics Teaching Tool CRMT2 will help you cultivate and sustain meaningful, rich, and rigorous mathematical learning spaces for all your students' experiences that foster mathematical curiosity and joy. The book walks you through each aspect of the framework and tool, guiding you to consider how your classroom structures lessons, tasks, and assessments. Honor the existing cultural strengths, experiences, and lived realities of all your students. Elicit diverse mathematical thinking and ideas. Support equitable access to rigorous mathematical learning and discourse for all students. Invite a sense of agency in each student's learning experience. Promote high engagement and excitement while learning mathematics. Nurture an understanding that mathematics is a powerful tool for making sense of the world. By weaving these strategies into classroom lessons, teachers can humanize mathematics instruction to successfully build a love for math while providing equitable learning opportunities that empower student voice and promote success in mathematics.

Instructor ,1978 *Mathemagics: A Magical Journey Through Advanced Mathematics - Connecting More Than 60 Magic Tricks To High-level Math* Ricardo V Teixeira, Jang-woo Park, 2020-05-29 This delightful book connects mathematical concepts in a dozen areas to magic tricks. Expositions of the mathematics precede description and analysis of the tricks. The expositions are too short for in-depth learning; the intent is to give sophomores a taste of the content and ideas of later mathematics courses. Each chapter features exercises on the mathematics and students can have fun practicing the tricks. *Mathematics Magazine* Teixeira and Park present over 60 different magic tricks while introducing students to high-level math areas. Readers will learn really interesting ideas that will better prepare them for future courses and help them find areas they might want to study deeper. And as a side effect, students will learn amazing magic tricks, century-old secrets, and details from famous magicians and mathematicians. The material was written to quickly present key concepts in several mathematical areas in a direct way. Little or no proficiency in math is assumed. In fact, students do not require any Calculus knowledge. And since chapters are almost independent from each other, this book also works as an introduction to several other courses. Topics covered include mathematical proofs, probability, abstract algebra, linear algebra, mathematical computing, number theory, coding theory, geometry, topology, real analysis, numerical analysis, and history of math. **New York Math: Math B** ,2000 **Periodical Title and Abbreviation by Title** Leland G.
