[Redshift Render Basic User Guide](#) Serdar Hakan DÜZGÖREN, Redshift is a high performance production quality renderer that supports biased rendering techniques for incredibly fast noise free renders With Redshift you can get the rendering performance of a small render farm from your existing workstation saving

you time and money and unleashing your creative potential This guide provides information on setting up and using Redshift In addition to documenting the various features and settings of Redshift this guide provides important tips to help you get the most out of Redshift including helping you choose the most appropriate global illumination techniques to use for a given scene and how to troubleshoot problems like splotches or flickering during animations To navigate this guide simply pick a topic from the Table of Contents on the left You can also search for a specific keyword using the search box located in the top right corner of every page

Caffe2 Quick Start Guide Ashwin Nanjappa,2019-05-31 Build and train scalable neural network models on various platforms by leveraging the power of Caffe2 Key FeaturesMigrate models trained with other deep learning frameworks on Caffe2Integrate Caffe2 with Android or iOS and implement deep learning models for mobile devicesLeverage the distributed capabilities of Caffe2 to build models that scale easilyBook Description Caffe2 is a popular deep learning library used for fast and scalable training and inference of deep learning models on various platforms This book introduces you to the Caffe2 framework and shows how you can leverage its power to build train and deploy efficient neural network models at scale It will cover the topics of installing Caffe2 composing networks using its operators training models and deploying models to different architectures It will also show how to import models from Caffe and from other frameworks using the ONNX interchange format It covers the topic of deep learning accelerators such as CPU and GPU and shows how to deploy Caffe2 models for inference on accelerators using inference engines Caffe2 is built for deployment to a diverse set of hardware using containers on the cloud and resource constrained hardware such as Raspberry Pi which will be demonstrated By the end of this book you will be able to not only compose and train popular neural network models with Caffe2 but also be able to deploy them on accelerators to the cloud and on resource constrained platforms such as mobile and embedded hardware What you will learnBuild and install Caffe2Compose neural networksTrain neural network on CPU or GPUImport a neural network from CaffeImport deep learning models from other frameworksDeploy models on CPU or GPU accelerators using inference enginesDeploy models at the edge and in the cloudWho this book is for Data scientists and machine learning engineers who wish to create fast and scalable deep learning models in Caffe2 will find this book to be very useful Some understanding of the basic machine learning concepts and prior exposure to programming languages like C and Python will be useful

[Professional CUDA C Programming](#) John Cheng,Max Grossman,Ty McKercher,2014-09-09 Break into the powerful world of parallel GPU programming with this down to earth practical guide Designed for professionals across multiple industrial sectors Professional CUDA C Programming presents CUDA a parallel computing platform and programming model designed to ease the development of GPU programming fundamentals in an easy to follow format and teaches readers how to think in parallel and implement parallel algorithms on GPUs Each chapter covers a specific topic and includes workable examples that demonstrate the development process allowing readers to explore both the hard and soft aspects of GPU programming Computing architectures are experiencing a fundamental shift toward scalable parallel

computing motivated by application requirements in industry and science This book demonstrates the challenges of efficiently utilizing compute resources at peak performance presents modern techniques for tackling these challenges while increasing accessibility for professionals who are not necessarily parallel programming experts The CUDA programming model and tools empower developers to write high performance applications on a scalable parallel computing platform the GPU However CUDA itself can be difficult to learn without extensive programming experience Recognized CUDA authorities John Cheng Max Grossman and Ty McKercher guide readers through essential GPU programming skills and best practices in Professional CUDA C Programming including CUDA Programming Model GPU Execution Model GPU Memory model Streams Event and Concurrency Multi GPU Programming CUDA Domain Specific Libraries Profiling and Performance Tuning The book makes complex CUDA concepts easy to understand for anyone with knowledge of basic software development with exercises designed to be both readable and high performance For the professional seeking entrance to parallel computing and the high performance computing community Professional CUDA C Programming is an invaluable resource with the most current information available on the market

Vray 5.0 (NEXT) User Guide Serdar Hakan DÜZGÖREN, Universal V Ray Settings This page provides a tutorial on universal settings for V Ray that work for most still images Overview The universal settings comprise a set of settings that work very well for still images in many situations and are the default for V Ray Next Please note that these settings are not optimal in the sense that with enough tweaking you can probably get similar quality with faster render times The beauty of these settings though is that they require almost no tweaking and you are guaranteed to get a good result in the end The advantages of these settings are o very little parameters for controlling render quality vs speed o works for a very large number of scenes o produces high quality results With the Progressive Image Sampler the default Render time min is set to 1 0 which might be insufficient for some scenes You can reset this to 0 0 min and rendering will continue until the Noise threshold is reached Setting the V Ray Renderer 1 Set V Ray as the current rendering engine with the default V Ray settings 2 The default settings are optimized to work universally so it is recommended to keep them Progressive image sampler with 100 Max subdivs and 1 Min subdivs GI enabled using Brute Force as Primary GI engine and Light Cache as Secondary GI engine 3 You can further refine the noise levels from the Progressive Image sampler rollout by adjusting the Noise Threshold and placing a 0 value for the Render time min 4 You can control the amount of AA vs shading samples for materials lights GI using the Min shading rate parameter in the Image Sampler rollout but the default value is optimised to work well for the majority of scenes
