This project to unilaterally totally control information flow is a product of complex ongoing interplay between technological, political, legal, corporate, economic, and social factors, including research and development of advanced digital technologies, an unremitting war on terror, relaxed surveillance laws, government alliances with information technology companies, mass media manipulation, and corporate globalism. This book details these and other factors contributing to this degenerative trend, specifies recommendations for constructive change, and provides a platform for grassroots efforts to stop the decline before it is too late.
