The Looting Machine Tom Burgis, 2016-05-03 One of Financial Times Books of the Year 2015 The trade in oil gas gems metals and rare earth minerals wreaks havoc in Africa During the years when Brazil India China and the other emerging markets have transformed their economies Africa's resource states remained tethered to the bottom of the industrial supply chain While Africa accounts for about 30 per cent of the world's reserves of hydrocarbons and minerals and 14 per cent of the world's population its share of global manufacturing stood in 2011 exactly where it stood in 2000 at 1 percent In his first book *The Looting Machine* Tom Burgis exposes the truth about the African development miracle for the resource states it's a mirage The oil copper diamonds gold and coltan deposits attract a global network of traders bankers corporate extractors and investors who combine with venal political cabals to loot the states value And the vagaries of resource dependent economies could pitch Africa's new middle class back into destitution just as quickly as they climbed out of it The ground beneath their feet is as precarious as a Congolese mine shaft their prosperity could spill away like crude from a busted pipeline This catastrophic social disintegration is not merely a continuation of Africa's past as a colonial victim The looting now is accelerating as never before As global demand for Africa's resources rises a handful of Africans are becoming legitimately rich but the vast majority like the continent as a whole is being fleeced Outsiders tend to think of Africa as a great drain of philanthropy But look more closely at the resource industry and the relationship between Africa and the rest of the world looks rather different In 2010 fuel and mineral exports from Africa were worth 333 billion more than seven times the value of the aid that went in the opposite direction But who received the money For every Frenchwoman who dies in childbirth 100 die in Niger alone the former French colony whose uranium fuels France's nuclear reactors In petro states like Angola three quarters of government revenue comes from oil The government is not funded by the people and as result it is not beholden to them A score of African countries whose economies depend on resources are rentier states their people are largely serfs The resource curse is not merely some unfortunate economic phenomenon the product of an intangible force What is happening in Africa's resource states is systematic looting Like its victims its beneficiaries have names **Net Zero Energy Buildings** Linda Reeder, 2016-03-31 This book presents 18 in depth case studies of net zero energy buildings low energy building that generate as much energy as they consume over the course of a year for a range of project types sizes and U S climate zones Each case study describes the owner's goals the design and construction process design strategies measurement and verification activities and results and project costs With a year or more of post occupancy performance data and other project information as well as lessons learned by project owners and developers architects engineers energy modelers constructors and operators each case study answers the questions What were the challenges to achieving net zero energy performance and how were these challenges overcome How would stakeholders address these issues on future projects Are the occupants satisfied with the building Do they find it comfortable Is it easy to operate How can other projects

benefit from the lessons learned on each project What would the owners designers and constructors do differently knowing what they know now A final chapter aggregates processes to engage in and pitfalls to avoid when approaching the challenges peculiar to designing constructing and owning a net zero energy building By providing a wealth of comparable information this book which will flatten the learning curve for designing constructing and owning this emerging building type and improve the effectiveness of architectural design and construction

Sustainable Design and Construction in Africa Oluwaseun Dosumu, Clinton Aigbavboa, 2018-08-14 This book addresses some of the countless challenges faced by developing countries when adopting sustainable design and construction and offers suggestions for the way forward for African development projects The authors argue that the pervasive non consideration of the interrelationship between the elements of sustainable design and construction is the reason for the current failures in sustainable design and construction in developed countries By treating sustainability as a complex system the authors provide the missing link between the design and construction of projects in a sustainable way with a view to improving industry and project performance In doing so the book posits the need for improved sustainability practice in developing countries lessons for developing countries from the successes and failures of sustainability adoption by developed nations factors influencing adoption of sustainability and effects of sustainable designs and construction on productivity human health and the environment at large This book will be of interest to construction researchers practitioners professional bodies housing policy makers and government institutions as well as training and funding providers in these areas

Cross-border Cultural Production Janet Wasko,2008 This volume addresses issues revolving around the production of mediated cultural products across borders More specifically the authors consider cross border cultural production in the film and television industries and how it affects and is affected by media centers and more recently established production locations The film and television industries have long been recognized as playing important economic political and cultural roles And while it could be argued that historically these forms of cultural production often have been international endeavors the choice of production sites has become an especially contentious issue during the last few decades as global production has expanded While some factions notably from the US film and television industries refer to this issue as runaway production this book takes a much broader look at the implications and consequences of this phenomenon Basically cross border production involves the expansion of production away from traditional centers whether to other countries or to other locations within the same country Thus this study covers a wide range of issues involving economic and political considerations as well as creative and aesthetic decision making
