Sports, Exercise, and Fitness Mary Beth Allen,2005-03-30 For reference librarians and researchers seeking information on sports and fitness this guide is an important first stop For collection development specialists it is an invaluable selection guide Allen describes and evaluates over 1 000 information sources on the complete spectrum of sports from basketball football and hockey to figure skating table tennis and weight training Focusing on English language works published between 1990 and the present the guide thoroughly covers traditional reference sources such as encyclopedias and bibliographies along with instructional sources in print formats online databases and Web sites To enable users in search of information on specific sports or fitness activities chapters are organized thematically according to broad type aquatic sports nautical sports precision and accuracy racket sports ice and snow sports ball sports cycling and so on with subcategories for such individual sports as soccer golf and yoga Within these categories works are further organized by type reference instructional and Web sites

Small Sample Size Solutions Rens van de Schoot,Milica Miočević,2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All

proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics
