Challenges and Strategies in Teaching Linear Algebra

Sepideh Stewart, Christine Andrews-Larson, Avi Berman, Michelle Zandieh, 2018-02-01 This book originated from a Discussion Group Teaching Linear Algebra that was held at the 13th International Conference on Mathematics Education ICME 13 The aim was to consider and highlight current efforts regarding research and instruction on teaching and learning linear algebra from around the world and to spark new collaborations As the outcome of the two day discussion at ICME 13 this book

focuses on the pedagogy of linear algebra with a particular emphasis on tasks that are productive for learning. The main themes addressed include theoretical perspectives on the teaching and learning of linear algebra, empirical analyses related to learning particular content in linear algebra, the use of technology and dynamic geometry software, and pedagogical discussions of challenging linear algebra tasks. Drawing on the expertise of mathematics education researchers and research mathematicians with experience in teaching linear algebra, this book gathers work from nine countries: Austria, Germany, Israel, Ireland, Mexico, Slovenia, Turkey, the USA, and Zimbabwe.

(Generalized) Fuzzy Matrices And Relations Herbert Toth, 2025-02-25. The book provides an overview of the main concepts and results related to fuzzy matrices and fuzzy relations using fuzzy in a general sense to mean many-valued. This overview, along with numerous references to original contributions dispersed across various journals, serves as a comprehensive guide for further exploration. This volume can be viewed in two ways: i) as a companion to the author's previous work *Relations: Concrete, Abstract, and Applied* published by WSPC 2020 but with a distinct emphasis on many-valued concepts, or ii) as a standalone volume that can be read independently, which necessarily includes some repetition of material from the earlier book as preliminary or reference content. Similar to the previous book, this one does not present new findings but offers a self-contained compilation of known results selected from the extensive research conducted over the past five decades, arranged in a systematic manner. The topics covered in this text have been the subject of intensive research over the last two decades, yet there has been no book publication on this subject for over 15 years. This book aims to bridge that gap.
