Head First Java Kathy Sierra, Bert Bates, 2005-02-09 Learning a complex new language is no easy task especially when it's an object oriented computer programming language like Java You might think the problem is your brain It seems to have a mind of its own a mind that doesn't always want to take in the dry technical stuff you're forced to study The fact is your brain craves novelty It's constantly searching scanning waiting for something unusual to happen After all that's the way it was built to help you stay alive It takes all the routine ordinary dull stuff and filters it to the background so it won't interfere with your brain's real work recording things that matter How does your brain know what matters It's like the creators of the *Head First* approach say suppose you're out for a hike and a tiger jumps in front of you what happens in your brain Neurons fire Emotions crank up Chemicals surge That's how your brain knows And that's how your brain will learn Java *Head First Java* combines puzzles strong visuals mysteries and soul searching interviews with famous Java objects to engage you in many different ways It's fast it's fun and it's effective And despite its playful appearance *Head First Java* is serious stuff a complete introduction to object oriented programming and Java You will learn everything from the fundamentals to advanced topics including threads
