Educational Costs, Prices and Financial Aid Rebecca Skinner, Blake Alan Naughton, 2008 The rising cost of attending U S colleges and universities is a growing concern as most Americans believe that college is out of financial reach for many otherwise qualified students For federal policymakers concerns focus on issues of affordability access for low income students and whether federal student financial aid is keeping pace with rising prices This book presents the current status and historical trends of college costs with an emphasis on the prices undergraduate students are ultimately charged at the varying types of institutions of higher education and how they pay for post secondary education using student financial aid

The Price of Admission Thomas J. Kane, 2010-12-01 Over the past fifteen years a college education has become increasingly valuable in the labor market As a result the stakes have been raised in the debate over college admissions and student financial aid With the gap in college enrollment widening by family income the time has come to examine the strengths and weaknesses of the American system for financing higher education and to rethink its structure from the ground up This book begins with an overview of the many indirect ways in which Americans pay for college as taxpayers students and parents and describes the sometimes perverse ways in which state and federal financial aid policies interact Thomas J Kane evaluates alternative explanations for the rise in public and private college costs weighing the role of federal financial aid policy higher input costs and competitive pressures on individual colleges He analyzes how far we have come in ensuring access to all Evidence suggests that large differences in college enrollment remain between high and low income students even those with similar test scores and attending the same high schools Kane promotes a package of reforms intended to squeeze more social bang from the many public bucks devoted to higher education For example he advocates front loading the Pell grant program

limiting eligibility to those in their first two years of college and providing a larger share of federal subsidies by assessing student resources after college rather than evaluating a single year of parents income and assets before college Copublished with the Russell Sage Foundation

Paying the Price Sara Goldrick-Rab, 2016-09-01 A bracing and well argued study of America's college debt crisis necessary reading for anyone concerned about the fate of American higher education Kirkus College is far too expensive for many people today and the confusing mix of federal state institutional and private financial aid leaves countless students without the resources they need to pay for it In *Paying the Price* education scholar Sara Goldrick Rab reveals the devastating effect of these shortfalls Goldrick Rab examines a study of 3 000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008 Half the students in the study left college without a degree while less than 20 percent finished within five years The cause of their problems time and again was lack of money Unable to afford tuition books and living expenses they worked too many hours at outside jobs dropped classes took time off to save money and even went without adequate food or housing In many heartbreaking cases they simply left school not with a degree but with crippling debt Goldrick Rab combines that data with devastating stories of six individual students whose struggles make clear the human and financial costs of our convoluted financial aid policies In the final section of the book Goldrick Rab offers a range of possible solutions from technical improvements to the financial aid application process to a bold public sector focused first degree free program Honestly one of the most exciting books I've read because Goldrick Rab has solutions It's a manual that I'd recommend to anyone out there if you're a parent if you're a teacher if you're a student Trevor Noah *The Daily Show*

[College Costs, Prices and Saving Plans](#) Lois M. Geller, 2004 Based on available data college tuition and fees have been rising more rapidly than household income over the past 2 decades The divergence is particularly pronounced for low income household and become less pronounced as household income increases Some research has identified specific factors related to increases in college price For example price increases at public 4 year institutions are strongly related to decreases in state appropriations Given the current budget crisis that is affecting states nationwide double digit increases in tuition and fees are slated in some states for the 2003 2004 academic year

The Right Price Christine Wiebe, 1999-10-22 Those contemplating medical school have heard horror stories about the cost of medical education This book helps medical students determine the real cost of their education and the best way to finance it based on the school they choose The volume also includes references for funding sources and counseling Readers will learn The different costs of education depending on the school's selected and how great the final tally may be Alternative ways to finance medical education The types of service repayment plans offered by the military and other organizations How to adapt to a life of temporary debt and stay up to date on laws and policies that impact medical school debt How much does it really cost to be a doctor Can a student afford to obtain financial aid at a prestigious school knowing that they will end up owing years later while friends who choose to attend less expensive schools pay off debts

quicker With an expert eye Christine Weibe gives readers the real scoop on medical school weaving in the importance of spending money wisely and realistically Since many students focus all their efforts on being accepted into medical school instead of forming a realistic picture of the financial costs and benefits of becoming a doctor she gives advice on avoiding disillusionment and how to budget money She also stresses the importance of obtaining credit reports getting and paying off loans and figuring out how much the student s family should contribute For example one way to save money is to take advantage of programs that will pay for schooling in exchange for the promise to practice medicine at that location for a specified time This practical book can be a guide for anyone considering or already making the trek through medical school

Why Does College Cost So Much? Robert B. Archibald,David H. Feldman,2010-11-10 Much of what is written about colleges and universities ties rapidly rising tuition to dysfunctional behavior in the academy Common targets of dysfunction include prestige games among universities gold plated amenities and bloated administration This book offers a different view To explain rising college cost the authors place the higher education industry firmly within the larger economic history of the United States The trajectory of college cost is similar to cost behavior in many other industries and this is no coincidence Higher education is a personal service that relies on highly educated labor A technological trio of broad economic forces has come together in the last thirty years to cause higher education costs and costs in many other industries to rise much more rapidly than the inflation rate The main culprit is economic growth itself This finding does not mean that all is well in American higher education A college education has become less reachable to a broad swathe of the American public at the same time that the market demand for highly educated people has soared This affordability problem has deep roots The authors explore how cost pressure the changing wage structure of the US economy and the complexity of financial aid policy combine to reduce access to higher education below what we need in the 21st century labor market This book is a call to calm the rhetoric of blame and to instead find policies that will increase access to higher education while preserving the quality of our colleges and universities *Financial Aid Financer* Joseph M.
