**Contemporary Perspectives in Human Resource Management and Organizational Behavior** Riann

Singh, Shalini Ramdeo, 2023-05-04 This book aims to address one of the key challenges facing Human Resource Management (HRM) and Organizational Behavior (OB) researchers. It delves into contemporary topics from which focused research models, ideas, and questions can be developed and tested. HRM and OB are closely related and intersect each other in the examination of practices which are aimed at managing employees and explaining their behaviors. Proposing to provide researchers with easy access to a slew of contemporary research advancements within the field, this work explores ten contemporary research areas within HRM and OB. Topics include innovative HRM/OB responses in crises, alternative work arrangements for the contemporary workplace, employee mental health, from diversity to inclusion in the workplace, workplace harassment, HRM in small and medium enterprises, alternative perspectives in employee turnover, organizational citizenship, and counterproductive work behaviors leading to work engagement and employee motivation in a changing environment. Providing researchers with a comprehensive overview of research advances within selected contemporary areas, this book seeks to spur critical thinking, spark alternative research perspectives, innovate extensions to existing theories, and provide the foundation from which focused research can grow and develop within these management fields.

*Emotions in the Workplace:*

*Advances in Research for the Well-being, volume II* María del Carmen Pérez-Fuentes, José Jesús Gázquez, María del Mar Molero Jurado, Mahia Saracostti, 2025-10-03 Emotions fulfill an eminently adaptive function in human development, strongly influencing higher-order psychological processes such as motivation, decision making, planning, or the capacity for teamwork, among others. In any case, emotional life is present in one way or another in the development of aptitudes and attitudes in the academic and professional trajectory. With adequate emotion management, emotions become powerful tools for meeting goals effectively, performing tasks adequately, and in brief, creating organizational settings in which satisfactory functional personal relations are a priority. Data from empirical evidence support the association of positive emotions with both personal benefits to the worker and to the organization. Therefore, this Research Topic is intended to analyze in depth the role of emotions as a resource for improving personal and professional development in the organizational context. This would include empirical studies contributing data on the role of emotions and establishment of statistically significant associations with variables which have traditionally been reported as relevant in the scope of organizations, e.g., communication, leadership, motivation, resilience, self-efficacy, empathy. In this Research Topic, we welcome manuscripts that provide interesting contributions on risk and protection factors with direct or indirect involvement of emotions which can identify the variables involved in the professional career and therefore development of explanatory and/or predictive models of personal and professional wellbeing. Along the same line, we welcome articles that emphasize the need to analyze the effects of intervention based on emotion management, recognition, understanding, expression on physical and/or mental health, performance, creativity, engagement, or at the opposite extreme, burnout, etc. Although priority will be given to studies which present results of data

collection and statistical analysis we will also consider proposals for theory review framed by a systematic methodology or meta analysis which excel in the relevance of their results Above all those with an up to date methodological framework which may be considered as a starting point of future lines of research specifically proposal for theoretical models development of evaluation instruments or design of intervention programs in the organizational context
