

# Colour

Colour is often one of the most exciting components of a painting, but what exactly is it? Understanding the basic principles of colour theory helps you analyse how others might use colour in their work. They use colour together with composition, perspective, and light and shade to strengthen the impact of the artwork itself.

## Mixing and comparing colours

The amount of light makes colours visible. Light from a source of different angles, colour and how transparent different pigments or different colours. The range of wavelengths you see is called the visible spectrum; the shorter visible wavelengths appear violet and the longest are red. There are gaps made from quantum jumps that occur some wavelengths and others above. Use of colours in traditional work. The colour in a painting can provide the means of reflecting light.
