Encyclopedia of Interior Design Joanna Banham, 1997-05 First published in 1997 Routledge is an imprint of Taylor Francis an informa company **The Architecture of Ruins** Jonathan Hill, 2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from

earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Japan-ness in Architecture Arata Isozaki, 2006 One of Japan s leading architects examines notions of Japan-ness as exemplified by key events in Japanese architectural history from the seventh to the twentieth century essays on buildings and their cultural context Japanese architect Arata Isozaki sees buildings not as dead objects but as events that encompass the social and historical context not to be defined forever by their everlasting materiality but as texts to be interpreted and reread continually In *Japan-ness in Architecture* he identifies what is essentially Japanese in architecture from the seventh to the twentieth century In the opening essay Isozaki analyses the struggles of modern Japanese architects including himself to create something uniquely Japanese out of modernity He then circles back in history to find what he calls Japan-ness in the seventh century Ise shrine the twelfth century Todai ji Temple and its sixteenth century reconstruction and the seventeenth century Katsura Imperial Villa the West s concept of architectural permanence and in the repetition of the ritual an alternative to modernity s anxious quest for origins He traces the constructive power of the Todai ji Temple to the vision of the director of its reconstruction the monk Chogen whose imaginative power he sees as corresponding to the revolutionary turmoil of the times The Katsura Imperial Villa with its chimerical spaces achieved its own Japan-ness as it reinvented the traditional shoin style And yet writes Isozaki what others consider to be the Japanese aesthetic is often the opposite of that essential Japan-ness that was born in moments of historic self definition the purified stylisation what Isozaki calls Japanesquisition lacks the energy of cultural transformation and reflects an island

retrenchment in response to the pressure of other cultures autobiographical account these essays written over a period of twenty years demonstrate Isozaki s standing as one of the world s leading architects and pre eminent architectural thinkers

Contemporary Japanese Architecture James Steele,2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture

geographic and cultural boundaries □□□ Arata Isozaki,1996 **Metabolism, the City of the Future** ,2011 First presented as a manifesto in the 1960s in Japan Metabolism is a theory of architecture contending that buildings and cities should be designed and developed in the same continuous way that the material substance of a natural organism is produced From the time of Japan s postwar redevelopment to its period of rapid economic growth the theory gave birth to grand visions of future cities encouraged the realization of much experimental architecture and also provided the foundation on which many of Japan s contemporary world renowned architects and designers could build their careers It is the most widely known modern architecture theory to have emerged from Japan This exhibition is the first ever to pose the question of what significance Metabolism holds today It draws on various documents and models to explore the thoughts and work of Tange Kenzo which set the scene for the emergence of Metabolism and the activities of the Metabolist architects and others during the 1960s up until Osaka s Expo 70 which in many ways was a showcase for the theory It also represents an important opportunity to think about the necessity of archiving and preserving distinguished historical documents and records related to the movement **Contemporary Architects** Ann Lee Morgan,Colin Naylor,1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor s note Arata Isozaki. Vol. 1, 1959-1978 Arata Isozaki,1991 **Encyclopedia of Modern Asia** David Levinson,Karen Christensen,2002 Volume one of a six volume set in which alphabetically arranged entries provide information on every aspect of modern Asia including its culture people economy government arts geography architecture religion and history **Encyclopedia of World Biography** ,1992 6 volume supplement numbered 13 18 to McGraw Hill encyclopedia of world biography published in 1973 by McGraw Hill covering people of the 20th century and including a study guide and index vol 16
