Bellary Shamanna Kesavan, 2009 **Library & Information Science Abstracts**, 2004 **Behavioral Architecture** Clovis Heimsath, 1977 Based on a new concept in architecture, this volume shows how to use the findings of behavioral psychology to create more meaningful architectural designs. It is one of the first syntheses by a practicing architect of what has been learned about the interaction of architecture and human behavior. In the process, the author looks at old problems in new ways, adding a new dimension to present architectural practices. Although its approach to architecture is unique, the book is primarily a practical work. Its main points are solidly supported by a detailed behavioral design process model, a step-by-step procedure for using behavior in contemporary design.
