1. Principal Investigator

Brendan Marlborough. Currently doing joint Computer Science and Information Systems Honours at Rhodes University.
Address: 6 Leicester Street Grahamstown 6139.
Email: g02m1213@campus.ru.ac.za

2. Title of Project

SIP / H.323 / AIX telephone customization

3. Mentoring

Professor Peter Clayton, Research Director for Computer Science, Rhodes University
P.Clayton@ru.ac.za

Professor Alfredo Terzoli, Centre of Excellence Co-ordinator, Computer Science, Rhodes University
A.Terzoli@ru.ac.za

4. Objective of Research

The main aim of this project is to enhance the features of the current IP telephone used in the department. This will involve fixing certain features of the phone which are not suitable for our purposes such as improving the display. Encryption may also be added to the phone in conjunction with a master's student. Another feature the phone lacks is the ability to connect over a PPPoE network and this may also be rectified. The following needs to be researched in order to accomplish these objectives: What changes will have to be made to the interface (keypad and display)

Mbanaso,Lucienne Abrahams,Kennedy Chinedu Okafor,2023-05-24 This book introduces impact driven research paths in computer science information systems and cybersecurity with practical insights effective instructions and examples The book takes the students through the full cycle of research until the point of submission and evaluation The book begins by providing postgraduate research students with the foundational concepts and techniques to simplify the complexities associated with choosing topics in the computer science CS information systems IS

and cybersecurity CY research domains The authors furnish readers with fundamentals that facilitate active quantitative qualitative and mixed methods research enquiries The content offers important perspectives on how to think about deepening research in CS IS and CY noting that these subjects can be studied from computational sciences engineering sciences health sciences social sciences or interdisciplinary perspectives This unique and contemporary book aims to benefit researchers graduate students and engineers in the fields of computer science information systems and cybersecurity in particular in addition to other engineering and technology disciplines *Neutrosophic Sets and Systems, Vol. 34, 2020. Special Issue: Social Neutrosophy in Latin America* Florentin Smarandache, Mohamed Abdel-Basset,Maikel Leyva Vazquez, Neutrosophy as science has inclusive attributes that make possible to extract the contributions of neutral values in the analysis of data sets it builds a unified field of logic for transdisciplinary studies that transcend the boundaries between natural and social sciences Neutral philosophy seeks to solve the problems of indeterminacy that appear universally to reform the current natural or social sciences with an open methodology to promote innovation The research products related in this special issue start from the premise that the difficulty is not the complexity of the social environment but the instrumental obsolescence to observe interpret and manage that complexity there are bold approaches and proposals for valid solutions that come to enrich the universe of resolution through the use of neutral methods In the last year the use of tools related to neutrosophy and its application to the social sciences modeling of social phenomena based on simulation agents problems associated with health psychology education environmental management and sustainability solutions and legal sciences has increased in the events organized by the Asociacion Latinoamericana de Ciencias Neutrosoficas ALCN in Spanish The methods of higher incidence are cognitive maps neutral Iadovs neutral Delphi analytical hierarchy process methods neutral statistics neutral personality models among the most significant In this special issue there is a predominance of research from Ecuadorian universities demonstrating how neutrosophy and its methods are consolidated as instruments of analysis inference and research validation   Cybersecurity Teaching in Higher Education Leslie F. Sikos,Paul Haskell-Dowland,2023-05-15 This book collects state of the art curriculum development considerations training methods techniques and best practices as well as cybersecurity lab requirements and aspects to take into account when setting up new labs all based on hands on experience in teaching cybersecurity in higher education In parallel with the increasing number and impact of cyberattacks there is a growing demand for cybersecurity courses in higher education More and more educational institutions offer cybersecurity courses which come with unique and constantly evolving challenges not known in other disciplines For example step by step guides may not work for some of the students if the configuration of a computing environment is not identical or similar enough to the one the workshop material is based on which can be a huge problem for blended and online delivery modes Using nested virtualization in a cloud infrastructure might not be authentic for all kinds of exercises because some of its characteristics can be vastly different from an enterprise network environment

that would be the most important to demonstrate to students The availability of cybersecurity datasets for training and educational purposes can be limited and the publicly available datasets might not suit a large share of training materials because they are often excessively documented but not only by authoritative websites which render these inappropriate for assignments and can be misleading for online students following training workshops and looking for online resources about datasets such as the Boss of the SOC BOTS datasets The constant changes of Kali Linux make it necessary to regularly update training materials because commands might not run the same way they did a couple of months ago The many challenges of cybersecurity education are further complicated by the continuous evolution of networking and cloud computing hardware and software which shapes student expectations what is acceptable and respected today might be obsolete or even laughable tomorrow **Writing Research Papers** James D.
