Digital Fabrication in Architecture, Engineering and Construction Luca Caneparo, 2013-10-02 Digital technologies are changing the relationship between design and construction with computer models CAD CAM and prototyping designers can gain direct control of building and construction processes The ability to digitally model designs and thus to use those models directly in the context of production creates a synthesis between design and construction in keeping with the tradition of the close relationship between design and craftsmanship between the quality of the design and the rules of the craft The evolution of the culture of design and construction is the underlying theme of this book The aim is to discuss the direction that innovation is now taking with a particular focus on today s cutting edge architectures The method addresses the ways in which different societies have dealt with the issues of their age regarding design and construction the different contributions provided by various techniques and with them the meanings expressed by the architecture As building design using digital tools requires specific skills in the fabrication processes and in the languages used by information technology the book also offers a practical guide to new methods and techniques of managing and controlling fabrication for AEC A systematic analysis of new skills used in the

design process presents an overview of opportunities for architects and engineers By collecting information on significant projects and analyzing them the book explores the technical and artistic potential of digital technology The cases studied are the outcomes of groundbreaking projects which were able to give form and significance to technological research They show that digital tools are not the exclusive prerogative of large firms but can also be adopted by teams working across small and medium sized firms firms which have been able to use informed research to link innovative design with the possibilities offered by digital fabrication in architecture

Computer-aided Design and the Architecture Student in the United States William John Mitchell,1974 Architectural Design and CAD Yvon Gardan,2012-12-06 In any business the essential element for the successful use of data processing is training This represents the largest expense both at start up and as CAD impacts design office procedures other than drafting Training is also the most difficult cost item to quantify Even more than the equipment training or retraining in the case of professionals in practice is the key to increased productivity Recommendations for specific programs of training are beyond the scope of this paper Once staff has been retrained to work at higher levels of productivity with data processing equipment they are more valuable They will be more difficult to replace Their new capabilities represent a significant investment in modernization both to the individual design office and to the design profession as a whole There is a shortage of qualified people with both professional and computer skills Competition among employers for people with these skills already exists and will probably continue into the foreseeable future At the outset of training an employment agreement is worth considering for the well being of all parties **The Architect's Guide to Computer Aided-Design** Mark Lauden Crosley,1988-01-18 With the advent of the computer in architectural design it is becoming increasingly important for the architect to have a broad based thorough working knowledge of the concepts and techniques of computer aided design CAD Exploring new territory this guide covers a broad range of the drawing design and management issues architects are currently facing or soon will be facing It presents both fundamental and advanced tactics that you can use to get the best possible results in applying computers to your architectural practice and is intended to help you take full advantage of the computer s assistance in visualizing and organizing your work Both helpful tips and practical techniques are incorporated with future speculation about the computer architecture marriage given International Computer-aided Design (CAD) Directory Philip C.
