Harnessing Quantum Cryptography for Next-Generation Security Solutions Chaubey, Nirbhay Kumar,Chaubey, Neha,2024-11-27 In an era where the escalating power of computers threatens the integrity of modern cryptographic systems the need for stronger more resilient security measures has never been more urgent Quantum cryptography with its solid theoretical foundation and increasingly mature practical implementations offers a promising solution From secure key distribution and direct communications to large prime factorization quantum cryptography is becoming the backbone of numerous critical applications including e commerce e governance and the emerging quantum internet As a result this field is capturing the attention of computer scientists and security professionals worldwide Harnessing Quantum Cryptography for Next Generation Security Solutions serves as an indispensable scholarly resource for those navigating the evolving landscape of cryptography and cybersecurity It compiles the latest research and advancements in quantum applications covering a broad spectrum of topics such as e commerce machine learning and privacy Security analysts software security engineers data scientists academics or policymakers will find that this comprehensive guide offers the insights and knowledge necessary to stay ahead in the world of cyber security

Blockchain Technology Solutions for the Security of IoT-Based Healthcare Systems Bharat Bhushan,Sudhir Kumar Sharma,Muzafer Saracevic,Azedine Boulmakoul,2023-01-10 Blockchain Technology Solutions for the Security of IoT Based Healthcare Systems explores the various benefits and challenges associated with the integration of blockchain with IoT healthcare systems focusing on designing cognitive embedded data technologies to aid better decision making processing and analysis of large amounts of data collected through IoT This book series targets the adaptation of decision making approaches under cognitive computing paradigms to demonstrate how the proposed procedures as well as big data and Internet of Things IoT problems can be handled in practice Current Internet of Things IoT based healthcare systems are incapable of sharing data between platforms in an efficient manner and holding them securely at the logical and physical level To this end blockchain technology guarantees a fully autonomous and secure ecosystem by exploiting the combined advantages of smart contracts and global consensus However incorporating blockchain technology in IoT healthcare systems is not easy Centralized networks in their current capacity will be incapable to meet the data storage demands of the incoming surge of IoT based healthcare wearables Highlights the coming surge of IoT based healthcare wearables and predicts that

centralized networks in their current capacity will be incapable to meet the data storage demands Outlines the major benefits and challenges associated with the integration of blockchain with IoT healthcare systems Investigates use cases and the latest research on securing healthcare IoT systems using blockchain technology Discusses the evolution of blockchain technology from fundamental theories to applications in healthcare systems Gathers and investigates the most recent research solutions that handle security and privacy threats while considering resource constrained IoT healthcare devices

Smart Trajectories Azedine Boulmakoul,Lamia Karim,Bharat Bhushan,2022-12-30 This book highlights the developments discoveries and practical and advanced experiences related to responsive distributed computing and how it can support the deployment of trajectory based applications in smart systems Smart Trajectories Metamodeling Reactive Architecture for Analytics and Smart Applications deals with the representation and manipulation of smart trajectories in various applications and scenarios Presented in three parts the book first discusses the foundation and principles for spatial information systems complex event processing and building a reactive architecture Next the book discusses modeling and architecture in relation to smart trajectory metamodeling mining and big trajectory data and clustering trajectories The final section discusses advanced applications and trends in the field including congestion trajectory analytics and real time Big Data analytics in cloud ecosystems Metamodeling distributed architectures reactive programming Big Data analytics NoSQL databases connected objects and edge fog cloud computing form the basis of the concepts and applications discussed The book also presents a number of case studies to demonstrate smart trajectories related to spatiotemporal events such as traffic congestion and pedestrian accidents This book is intended for graduate students in computer engineering spatial databases complex event processing distributed systems and geographical information systems GIS The book will also be useful for practicing traffic engineers city managers and environmental engineers interested in monitoring and security analysis
