It is our pleasure to present the papers accepted for the 22nd International Workshop on Languages and Compilers for Parallel Computing held during October 8-10 2009 in Newark Delaware USA Since 1986 LCPC has become a valuable

venue for researchers to report on work in the general area of parallel computing high performance computer architecture and compilers LCPC 2009 continued this tradition and in particular extended the area of interest to new parallel computing accelerators such as the IBM Cell Processor and Graphic Processing Unit GPU This year we received 52 submissions from 15 countries Each submission received at least three reviews and most had four The PC also sought additional external reviews for contentious papers The PC held an all day phone conference on August 24 to discuss the papers PC members who had a conflict of interest were asked to leave the call temporarily when the corresponding papers were discussed From the 52 submissions the PC selected 25 full papers and 5 short papers to be included in the workshop proceeding representing a 58% acceptance rate We were fortunate to have three keynote speeches a panel discussion and a tutorial in this year's workshop First Thomas Sterling Professor of Computer Science at Louisiana State University gave a keynote talk titled HPC in Phase Change Towards a New Parallel Execution Model Sterling argued that a new multi dimensional research thrust was required to realize the design goals with regard to power complexity clock rate and reliability in the new parallel computer systems ParalleX an exploratory execution model developed by Sterling's group was introduced to guide the co design of new architectures programming methods and system software

Theorem Proving in Higher Order Logics Konrad Slind, Annette Bunker, Ganesh C. Gopalakrishnan, 2004-09-01 This volume constitutes the proceedings of the 17th International Conference on Theorem Proving in Higher Order Logics

TPHOLs 2004 held September 14-17, 2004 in Park City, Utah, USA. TPHOLs covers all aspects of theorem proving in higher order logics as well as related topics in theorem proving and verification. There were 42 papers submitted to TPHOLs 2004 in the full research category, each of which was refereed by at least 3 reviewers selected by the program committee. Of these submissions, 21 were accepted for presentation at the conference and publication in this volume. In keeping with longstanding tradition, TPHOLs 2004 also offered a venue for the presentation of work in progress, where researchers invited discussion by means of a brief introductory talk and then discussed their work at a poster session. A supplementary proceedings containing papers about in progress work was published as a 2004 technical report of the School of Computing at the University of Utah. The organizers are grateful to Al Davis, Thomas Hales, and Ken McMillan for agreeing to give invited talks at TPHOLs 2004. The TPHOLs conference traditionally changes continents each year in order to maximize the chances that researchers from around the world can attend.
