Guide for Databricks® Spark Python (PySpark) CRT020 Certification Rashmi Shah, Apache Spark is one of the fastest growing technology in BigData computing world. It supports multiple programming languages like Java, Scala, Python, and R. Hence many existing and new frameworks started to integrate Spark platform as well in their platform, for instance Hadoop, Cassandra, EMR, etc. While creating Spark certification material, Hadoop Exam Engineering team found that there is no proper material and book is available for the Spark version 2.x which covers the concepts as well as use of various features and found difficulty in creating the material. Therefore they decided to create full length book for Spark Databricks CRT020 Spark Scala Python or PySpark Certification, and the outcome of that is this book. In this book, technical team try to cover both fundamental concepts of Spark 2.x topics which are part of the certification syllabus as well as add as many exercises as possible, and in current version we have around 46 hands-on exercises added which you can execute on the Databricks community edition because each of these exercises tested on that platform as well as this book is focused on the PySpark version of the certification, hence all the exercises and their solutions provided in the Python. This book is divided in 13 chapters as you move ahead chapter by chapter you would be comfortable with the Databricks Spark Python certification CRT020. Some exercises you can convert into different programming language like Java, Scala, R, as well. It's more about the syntax.
