E Commerce E Business And E Government:

Towards the E-Society Beat Schmid, Katarina Stanoevska-Slabeva, Volker Tschammer, 2001-09-30 I3E 2001 is the first in a series of conferences on e commerce e business and government organised by the three IFIP committees TC6 TC8 and TC11. It provides a forum where users engineers and scientists from academia industry and government can present their latest findings in e commerce e business and government applications and the underlying technology to support those applications. The conference comprises a main track and mini tracks dedicated to special topics. The papers presented in the main track were rigorously refereed and selected by the International Programme Committee of the conference. Thematically they were grouped in the following sessions: Sessions on security and trust comprising nine papers referring to both trust and security in general as well as presenting specific concepts for enhancing trust in the digital society; Session on inter organisational transactions covering papers related to auditing of inter organizational trade procedures cross organizational workflow and transactions in Business to Business platforms; Session on virtual enterprises encompassing papers describing innovative approaches for creating virtual enterprises as well as describing examples of virtual enterprises in specific industries; Session on online communities containing three papers which provide case studies of specific online communities and various concepts on how companies can build and harness the potential of online communities; Sessions on strategies and business models with papers describing specific business models as well as general overviews of specific approaches for E Strategy formulation.

Challenges of Expanding Internet: E-Commerce, E-Business, and E-Government Matorhisa Funabashi, Adam Grzech, 2005-09-28 2 1 E Government e Governance and e Democracy. The term Electronic Government e Government as an expression was coined after the example of Electronic Commerce. In spite of being a relatively recent expression e Government designates a field of activity that has been with us for several decades and which has attained a high level of penetration in many countries. What has been observed over the recent years is a shift on the broadness of the e Government concept. The ideas inside e Governance and e Democracy are to some extent promising big changes in public administration. The demand now is not only simply delivering a service line. It is to deliver complex and new services which are all citizen centric. Another important demand is related to the improvement of citizen s participation in governmental processes and decisions so that the governments transparency and legitimacy are enforced. In order to fulfill these new demands a lot of research has been done over the recent years see Section 3 but many challenges are still to be faced not only in the technological field but also in the political and social aspects.
