Email and archive migration to Office 365 and hybrid environments

For complex migrations to Office 365, Office 365 using VDI with Azure, and hybrid cloud/on-premises environments, being able to manage live mail, archives, and offline PST files together enables workflows to be arranged to suit you, rather than you having to work within separate frameworks.

Whatever you are migrating from and whatever your target email and archive environment, QUADROtech can help.

We are the only specialist migration vendor with a single 'QUADStack' suite of proven applications for migrating live, archive and PST/offline files, and our turnkey Managed Migration Service is ideal if you have limited resources. One vendor, one suite of applications, and one agreement simplify contracts and procurement.

Proprietary technologies like Advanced Extraction Technology (AET), Advanced Ingestion Protocol (AIP) and Highly Optimized Transport System (HOTS) dramatically improve the speed and reliability of data migration – vital when you are taking bandwidth and throttling into consideration – and get you up and running with your Office 365 or hybrid environment faster.
