Encyclopedia of Cryptozoology Michael Newton, 2016-10-05 On every continent and in every nation animals unrecognized by modern science are reported on a daily basis People passionately pursue these creatures the name given to their field of study is cryptozoology Coined in the 1950s the term literally means the science of hidden animals When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past what makes an animal of interest to cryptology is that it is unexpected This reference work presents a flesh and blood view of cryptozoology Here 2 744 entries are listed the majority of which each describe one specific creature or type of creature Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology

The Paleoanthropology of Eastern Asia Christopher J. Bae, 2024-09-30 Research in human evolution in Asia has long been thought to lag far behind similar research in Africa and Europe However the limited dissemination of findings is often to blame rather than a lack of scholarship The *Paleoanthropology of Eastern Asia* attempts to rectify this misconception by synthesizing research on human evolution in eastern Asia into a single authoritative and definitive text Covering the span of time from more than two million years ago to the end of the last Ice Age 15 000 years ago this book examines key events such as the arrival of the earliest hominins in eastern Asia and the evolution and interaction of various hominin species

including Homo erectus Homo sapiens and a few more in between While fossils reveal what these hominins may have looked like the rich Paleolithic archaeological record yields insights into their behavior Hand axes have been found in eastern Asia where they were previously believed to have been absent Watercraft was used by foragers as early as 40 000 years ago to voyage to the Japanese archipelago In Indonesia cave art paintings older than those from the Lascaux caves in France have been reported Such new and important discoveries continue to emerge Providing comprehensive coverage of paleoanthropological research in eastern Asia from the groundbreaking finds in a cave near Beijing in the early twentieth century to the discovery and identification of new human species during the twenty first century this book will captivate anyone interested in the human evolutionary record *Walter Granger, 1872-1941, Paleontologist* Vincent L.
