Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars

The College Completion Glass—Half-Full or Half-Empty? Tiffany Beth Mfume, 2018-12-21 Despite the Great Recession and looming student loan debt crisis college education remains the most proven invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment Mfume suggests that the value added of even one year of college can be transformative As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures

The College Completion Glass Half Full or Half Empty Exploring the Value of Postsecondary Education presents a new paradigm for higher education one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates a model which merges conventional practices and supports for students with non traditional partnerships with and advocacy from successful non completers

[Breaking Ranks](#) Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Evaluating and Responding to College Guidebooks and Rankings R. Dan Walleri, Marsha K. Moss, 1995-12-27 The proliferation of

college guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research. Acknowledging the fact that the public, the consumers, has a great need for information about different institutions in order to make informed college choices for themselves or their children, all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings. This volume explores some of the major facets of and issues surrounding college guidebooks and ratings. The background and development of these publications are traced followed by discussion of major issues and perspectives: consumer use of the publications, validity of ratings and the institutional burden of supplying the needed information. Views from both the institutions and the publishers are presented. This is the 88th issue of the quarterly journal *New Directions for Institutional Research*. For more information on the series please see the Journals and Periodicals page.

Between Mission and Market Daniel Rosenberg, 2017-04-26 *Between Mission and Market: The Freshman Year in a Corporate Age* focuses on the arrival of college freshmen at the moment of the transformation. It uses Adelphi University in suburban New York City to study an attempt to resolve first year difficulties. As higher education institutions turn into enterprises run on business models, the pressures of getting into college, including the taking of the SAT and ACT, have induced stress, addictions, eating disorders, drug use, and mental problems. However, special programs to ease the first year transition through counseling and support are run as cheaply as possible. This book confronts some of the cardinal controversies in higher education, particularly those affecting first year students: high stakes testing in general, particularly the SAT, the intensification of student debt, and the financial sentence imposed upon all who incur it, and the dramatic pressures placed upon freshmen as they transition to college.

The New York Times Practical Guide to Practically Everything Amy D. Bernstein, Peter W. Bernstein, 2006-10-17 A collection of information on aspects of daily life and a variety of popular topics such as the home, health, animals, nature, sports, and entertainment.

[University Rankings, Diversity, and the New Landscape of Higher Education](#), 2019-02-18 University rankings are a relatively new phenomenon in higher education. Although quite an established practice in the U.S., it is only within the last decade that attempts to analyse university performance have spread to the rest of the world, and that we also have seen new global rankings appear. Rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly, including the methods used and the indicators chosen, and investigate the objectives claimed. If

university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector
