Media and Communication Theory Bart Cammaerts, 2026-02-27 This innovative textbook explores media and communication theory and its intersections with social and political theory through the prism of eight core dichotomies: communication media, private/public, production/reception, material/symbolic, mainstream/alternative, abundance/scarcity, control/freedom, and virtual/real, revealing their complex interrelationships and significance in understanding contemporary media and communication landscapes. Students will gain a nuanced understanding of media and communication theories by examining both sides of each dichotomy and their dynamic interplay. The book historicizes each concept pair, illustrates them with past and present examples, and demonstrates how competing paradigms often complement rather than contradict each other. This approach helps readers grasp theoretical complexity, recognize the democratic importance of media and communication, and develop critical thinking skills through engaging case studies and discussion questions in each chapter. This textbook is designed for undergraduate and postgraduate students taking media and communication theory courses. Instructors teaching critical media and communication theory will find the dichotomy-based approach particularly valuable for helping students navigate complex theoretical debates and understand the field's intellectual development. It will also be useful supplementary reading for specific topics within broader media studies programs.
