[Advanced Learning Analytics Methods](#) Mohammed Saqr, Sonsoles López-Pernas, 2025-10-25

This is an open access book This comprehensive and timely methodological book introduces several novel topics under the overarching sections of advanced learning analytics LA artificial intelligence AI precision education and complex systems These topics are presented using accessible language beginning with introductory chapters that cover the fundamentals of each section followed by step by step tutorials featuring code and datasets for various methods within each area Although the title refers to advanced LA the book is written for the broader educational research community and is of interest to quantitative researchers from diverse backgrounds The first section focuses on Explainable AI and machine learning ML with an introduction to the methods their applications and tutorials The second section outlines the foundational concepts of LLMs their potential applications and related methodologies with a tutorial on using LLMs in various analytical tasks The third section focuses on complex systems which have become integral to many disciplines and have enabled breakthroughs in modeling intractable problems Here three chapters cover Transition Network Analysis TNA which fills a critical gap in modeling the temporal unfolding of learning processes over time from a complex systems perspective The final section addresses precision education with a particular emphasis on person centered and person specific idiographic methodologies

Building Data-Driven Applications with LlamaIndex Andrei Gheorghiu, 2024-05-10 Solve real world problems easily with artificial intelligence AI using the LlamaIndex data framework to enhance your LLM based Python applications Key Features Examine text chunking effects on RAG workflows and understand security in RAG app development Discover chatbots and agents and learn how to build complex conversation engines Build as you learn by applying the knowledge you gain to a hands on project Book Description Discover the immense potential of Generative AI and Large Language Models LLMs with this comprehensive guide Learn to overcome LLM limitations such as contextual memory constraints prompt size issues real time data gaps and occasional hallucinations Follow practical examples to personalize and launch your LlamaIndex projects mastering skills in ingesting indexing querying and connecting dynamic knowledge bases From fundamental LLM concepts to LlamaIndex deployment and customization this book provides a holistic grasp of LlamaIndex s capabilities and applications By the end you ll be able to resolve LLM challenges and build interactive AI driven applications using best practices in prompt engineering and troubleshooting Generative AI projects What you will learn Understand the LlamaIndex ecosystem and common use cases Master techniques to ingest and parse data from various sources into LlamaIndex Discover how to create optimized indexes tailored to your use cases Understand how to query LlamaIndex effectively and interpret responses Build an end to end interactive web application with LlamaIndex Python and Streamlit Customize a LlamaIndex configuration based on your project needs Predict costs and deal with potential privacy issues Deploy LlamaIndex applications that others can use Who this book is for This book is for Python developers with basic knowledge of natural language processing NLP and LLMs looking to build interactive LLM applications Experienced developers and conversational AI developers will also benefit from the advanced techniques covered in the book to fully unleash the capabilities of the framework **Openai** Gerard Blokdyk, 2017-11-21 Which individuals teams or departments will be involved in OpenAI If substitutes have been appointed have they been briefed on the OpenAI goals and received regular communications as to the progress to date How can the value of OpenAI be defined What is our formula for success in OpenAI What is the total cost related to deploying OpenAI including any consulting or professional services Defining designing creating and implementing a process to solve a business challenge or meet a business objective is the most valuable role In EVERY company organization and department Unless you are talking a one time single use project within a business there should be a process Whether that process is managed and implemented by humans AI or a combination of the two it needs to be designed by someone with a complex enough perspective to ask the right questions Someone capable of asking the right questions and step back and say What are we really trying to accomplish here And is there a different way to look at it This Self Assessment empowers people to do just that whether their title is entrepreneur manager consultant Vice President CxO etc they are the people who rule the future They are the person who asks the right questions to make OpenAI investments work better This OpenAI All Inclusive Self Assessment enables You to be that person All the tools you need to an in depth OpenAI Self Assessment Featuring 700 new
