Minako O'Hagan,2011 The new communications infrastructure based on Web 2.0 suggests a formidable impact on translation. The prevailing technological trends for openness, sharing, and collaboration are prompting participation by the Internet crowd in well-established professional areas of work, leading to the emergence of community translation or so-called translation crowdsourcing. Under the theme of community translation as a social activity and its possible consequences, contributors in this volume consolidate the developments to date and cover the latest initiatives while addressing pertinent issues arising from the blurred boundary between professionals and non-professionals. Master's Thesis from the year 2016 in the subject Tourism. Miscellaneous grade 1-3. Stralsund University of Applied Sciences Faculty of Business Studies course Tourism Development Strategies language English abstract. This thesis is aimed to test a hypothesis of the country brand's reliance on the online presence. The created evaluation model used in the primary research of this paper determines whether there is enough evidence in the data gathered to indicate that the online presence of a tourist destination corresponds to its country brand's rank. The research is focused on the online presence of Lithuania as a weak ranking country brand. The online presence results of Lithuania as a tourist destination are compared to the examples of two stronger country brands. The conclusions derived from the comparison of the results determine the success of the online presence of Lithuania, establish whether the hypothesis of the thesis is true or not, while noting the limitations and possible errors of the research and provide the suggestions for the country brand and online presence improvements. **Forbes**. Shane P. Desselle, David P. Zgarrick, Greg Alston, 2016-06-05. 1. Pharmacy Management Text. As pharmacy practice moves from a product orientation to a patient orientation, there are unique challenges that arise in managing the value-added services that pharmacists are developing to meet patient needs in medication therapy management. A section of this book is dedicated to the planning, implementation, and reimbursement of these new patient care services offered by pharmacists. Several chapters are dedicated to describing the risks inherent in pharmacy practice and the impact that laws, regulations, and medication errors have on pharmacy management. The final section describes how management functions are applied in specific pharmacy practice settings: independent chain health systems, managed environments, safety net operations, and settings in unique health systems. **HOW ORGANIZED**. Each chapter is divided into several sections to facilitate the reader's understanding and application of the material. Chapters begin with a list of learning objectives that outline the major topics to be addressed. A brief scenario is used to describe how a pharmacy student or pharmacist may need or apply the information described in this chapter in their daily lives or practice. Questions at the start of

each chapter provide direction and assist the reader in understanding what they can expect to learn The text of each chapter provides comprehensive coverage of the content and theory underlying the major concepts References to the management and pharmacy literature are commonly used to provide readers with links to additional background information Explanations and applications are also used to help readers better understand the need to master and apply each concept Questions at the end of each chapter encourage readers to think about what they have just learned and apply these concepts in new ways

WHAT STUDENTS WILL GAIN FROM THIS BOOK If you are a pharmacy student this book will help you gain an appreciation for the roles of management in pharmacy practice regardless of your future position or practice setting This book will also provide you with a variety of management theories and tools that you can apply in your daily life For educators this book has been designed as a comprehensive pharmacy management textbook As a whole it is meant to be used in survey courses that cover many areas of pharmacy management The section format also allows the book to be used in courses that focus on specific pharmacy management functions or topics The sections and content of each chapter are meant not only to provide valuable information that is easy for students to understand but also to stimulate further discussion and motivate students to learn more on their own
