Artificial Intelligence David R. Martinez, Bruke M. Kifle, 2024-06-11 The first text to take a systems engineering approach to artificial intelligence AI from architecture principles to the development and deployment of AI capabilities Most books on artificial intelligence AI focus on a single functional building block such as machine learning or human machine teaming Artificial Intelligence takes a more holistic approach addressing AI from the view of systems engineering The book centers on the people process technology triad that is critical to successful development of AI products and services Development starts with an AI design based on the AI system architecture and culminates with successful deployment of the AI capabilities Directed toward AI developers and operational users this accessibly written volume of the MIT Lincoln Laboratory Series can also serve as a text for undergraduate seniors and graduate level students and as a reference book Key features In depth look at modern computing technologies Systems engineering description and means to successfully undertake an AI product or service development through deployment Existing methods for applying machine learning operations MLOps AI system architecture including a description of each of the AI pipeline building blocks Challenges and approaches to attend to responsible AI in practice Tools to develop a strategic roadmap and techniques to foster an innovative team environment Multiple use cases that stem from the authors MIT classes as well as from AI practitioners AI project managers early career AI team leaders technical executives and entrepreneurs Exercises and Jupyter notebook examples AI Systems Performance Engineering Chris Fregly, 2025-11-11 Elevate your AI system performance capabilities with this definitive guide to maximizing efficiency across every layer of your AI infrastructure In today s era of ever growing generative models AI Systems Performance Engineering provides engineers researchers and developers with a hands on set of actionable optimization strategies Learn to co optimize hardware software and algorithms to build resilient scalable and cost effective AI systems that excel in both training and inference Authored by Chris Fregly a performance focused engineering and product leader this resource transforms complex AI systems into streamlined high impact AI solutions Inside you ll discover step by step methodologies for fine tuning GPU CUDA kernels PyTorch based algorithms and multinode training and inference systems You ll also master the art of scaling GPU clusters for high performance distributed model training jobs and inference servers The book ends with a 175 item checklist of proven ready to use optimizations Codesign and optimize hardware software and algorithms to achieve maximum throughput and cost savings Implement cutting edge inference strategies that reduce latency and boost throughput in real world settings Utilize industry leading scalability tools and frameworks Profile diagnose and eliminate performance bottlenecks across complex AI pipelines Integrate full stack optimization techniques for robust reliable AI system performance Event-Database Architecture for Computer Games Rodney Quaye, 2025-07-25 Event Database Architecture for Computer Games proposes the first explicit software architecture for game development answering the problem of building modern computer games with little or no game design In this

volume an example of a practical production process based on the software production process is explained including examples of the game design technical design data design and tools design in that process This volume includes a brief overview on how to optimise the results This leads on to an exploration of how staff especially Software Engineers typically view optimisation It also explains how the vision of the Engineers relates to the vision of the leadership of a project or company It describes how this leadership can also affect the efficacy of a production process including the Event Database Production Process This book will be of great interest to professional game developers involved in management roles such as Technical Directors and Game Producers and technical roles such as Tools Programmers UI Programmers Gameplay Programmers and Engineers as well as students studying game development and programming Rodney Quaye is Senior Software Development Engineer in Test at Build A Rocket Boy He has worked in the Computer Games industry for over 16 years He has worked at several Games Studios including Sumo Digital nDreams Supermassive Games Traveller s Tales Hotgen Oysterworld Second Impact Flaming Pumpkin Goldhawk Interactive Jagex Gusto Games Criterion Asylum Entertainment Codemasters and Deibus Studios The famous titles he has worked on include Burnout 2 and 3 for Criterion LMA Manager for Codemasters Runescape for Jagex Lego Worlds for Traveller s Tales and Everywhere for Build A Rocket Boy

Cloud Computing for Machine Learning and Cognitive Applications Kai Hwang,2017-07-07 The first textbook to teach students how to build data analytic solutions on large data sets using cloud based technologies This is the first textbook to teach students how to build data analytic solutions on large data sets specifically in Internet of Things applications using cloud based technologies for data storage transmission and mashup and AI techniques to analyze this data This textbook is designed to train college students to master modern cloud computing systems in operating principles architecture design machine learning algorithms programming models and software tools for big data mining analytics and cognitive applications The book will be suitable for use in one semester computer science or electrical engineering courses on cloud computing machine learning cloud programming cognitive computing or big data science The book will also be very useful as a reference for professionals who want to work in cloud computing and data science Cloud and Cognitive Computing begins with two introductory chapters on fundamentals of cloud computing data science and adaptive computing that lay the foundation for the rest of the book Subsequent chapters cover topics including cloud architecture mashup services virtual machines Docker containers mobile clouds IoT and AI inter cloud mashups and cloud performance and benchmarks with a focus on Google s Brain Project DeepMind and X Lab programs IBKai HwangM SyNapse Bluemix programs cognitive initiatives and neurocomputers The book then covers machine learning algorithms and cloud programming software tools and application development applying the tools in machine learning social media deep learning and cognitive applications All cloud systems are illustrated with big data and cognitive application examples
