web physical science chapter 6 thermal energy thermal energy your results the correct answer for each question is indicated by a 1 thermal energy is the of the particles in a material is the thermal energy that flows from a material with a higher temperature to one with a lower temperature

**chapter 16 thermal energy and heat henry county schools** - Feb 28 2022

web thermal energy depends on the mass temperature and phase solid liquid or gas of an object thermal expansion occurs when particles of matter move farther apart as temperature increases thermal expansion is an increase in the volume of a material due to a temperature increase

what is heat lesson teachengineering - Jan 30 2022

web oct 31 2021 explain that heat is the flow of energy from hot materials to cold materials describe that molecules in a material begin to vibrate or move more quickly when the material is heated identify conduction as heat transfer within and between solids identify convection as heat transfer involving gases or liquids
